

**BMO Callable Contingent Income Barrier Notes, Series 477 (USD) (F-Class) Due January 9, 2031,**

Linked to Solactive Canada Blue Chip AR Index

**7 - Year Term***Subject to the notes being automatically called by Bank of Montreal***Monthly Call Feature***\* starting after the 5th observation date***10.71% per annum Contingent Coupon Paid Monthly****30% Contingent Protection at Maturity****Investment Highlights**

The notes offered by the pricing supplement are unsecured debt securities issued by Bank of Montreal. The objective of the notes is to offer investors an income stream via potential periodic coupon payments with contingent downside protection against the loss of their principal investment from any negative performance above the barrier level of Solactive Canada Blue Chip AR Index over the term of the notes.

**The principal amount is NOT fully protected under the notes.**

- Contingent coupon: 0.8925% monthly (equivalent to 10.71% per annum) provided that the closing level is at or above the coupon payment level.
- **Coupon payment level: 70.00% of the initial level.**
- **Autocall:** Automatic early redemption at par plus any final coupon payment if the closing level is at or above the autocall level on any autocall observation date. The notes cannot be automatically called prior to the sixth observation date.
- **Autocall level:** 105.00% of the initial level.
- **Minimum payment:** USD \$1.00
- **Barrier protection:** 30.00%
- **Downside participation: 100.00%, below the barrier level.**

**Reference Portfolio**

Reference asset	Ticker symbol
Solactive Canada Blue Chip AR Index	SOLCABCA

The Solactive Canada Blue Chip AR Index is an adjusted return index. It aims to track the gross total return performance of the Solactive Canada Blue Chip GTR Index (the "underlying index"), calculated in Canadian dollars, less an adjusted return factor of 75 index points per annum that will be calculated daily in arrears (the "adjusted return factor"). The underlying index is a representation of 10 Blue Chip companies from the Canadian stock market. The closing level on November 30, 2023 was 1,199.85. The adjusted return factor divided by the closing level was therefore equal to 6.25% on November 30, 2023. Over the term of the notes, the sum of the adjusted return factor will be approximately 525 index points, representing 43.79% of the closing level on November 30, 2023.

The dividend yield of the underlying index on November 30, 2023 was 5.91%, representing an aggregate dividend yield of approximately 41.40% over the term of the notes (assuming the dividend yield remains constant and the dividends are not reinvested). An investment in the notes does not represent a direct or indirect investment in the reference asset. You have no right or entitlement to the dividends or distributions paid on the reference asset.

### Additional Offering Details

<b>Issuer</b>	Bank of Montreal
<b>Issuer rating</b>	Moody's: Aa2; S&P: A+; DBRS: AA (long-term deposits > 1 year).
<b>Reference asset</b>	Solactive Canada Blue Chip AR Index (ticker: SOLCABCA).
<b>Currency of notes</b>	U.S. dollar (USD).
<b>Stated principal amount</b>	USD \$100.00 per note.
<b>Minimum investment</b>	USD \$2,000.00 (20 notes).
<b>Issue date</b>	On or around January 9, 2024.
<b>Final valuation date</b>	January 2, 2031, subject to postponement if such date is not an exchange day or a market disruption event occurs.
<b>Maturity date</b>	January 9, 2031, subject to the notes being automatically called by us.
<b>Term</b>	Approximately seven (7) years.
<b>Observation and Payment Dates</b>	See "Observation and Payment Dates" below.
<b>Coupon rate</b>	0.8925% monthly (equivalent to 10.71% per annum).
<b>Coupon payment level</b>	70.00% of the initial level.
<b>Contingent coupon payments</b>	<p>If the notes have not been redeemed, on each coupon payment date there are two scenarios:</p> <ul style="list-style-type: none"> <li>• If the closing level on the immediately preceding coupon observation date is at or above the coupon payment level, you will receive a coupon payment equal to the stated principal amount multiplied by the coupon rate.</li> <li>• Otherwise, you will not receive a payment on such coupon payment date.</li> </ul>
<b>Autocall level</b>	105.00% of the initial level.
<b>Automatic early redemption</b>	The notes will be automatically redeemed on any autocall payment date if, on the corresponding autocall observation date, the closing level is at or above the autocall level. On any such redemption, you will receive a cash payment equal to the stated principal amount, in addition to any final contingent coupon payment. No further payments will be made after such autocall payment date. The notes cannot be automatically called prior to the sixth observation date.
<b>Initial level</b>	The closing level on the issue date.
<b>Final level</b>	The closing level on the final valuation date.
<b>Reference asset return</b>	<p>In respect of any given date, the reference asset return shall be determined in accordance with the following formula:</p> $= \frac{\text{closing level} - \text{initial level}}{\text{initial level}}$
<b>Final reference asset return</b>	The reference asset return on the final valuation date.

<b>Barrier level</b>	70.00% of the initial level.
<b>Downside participation</b>	100.00%, below the barrier level.
<b>Barrier event</b>	Monitoring at maturity only.
<b>Payment at maturity</b>	<p>If the notes have not been redeemed, you will receive at maturity for each note you then hold, in addition to any final contingent coupon payment:</p> <ul style="list-style-type: none"> <li>• If the final level is at or above the barrier level, a maturity payment equal to USD \$100.00.</li> <li>• If the final level is below the barrier level, a maturity payment directly linked to the performance of the reference asset. The maturity payment will be equal to the following formula, subject to a minimum payment of USD \$1.00:  <math display="block">= \text{USD } \\$100.00 + (\text{USD } \\$100.00 \times \text{final reference asset return})</math> </li> </ul> <p><b>If the notes have not been redeemed early, and the final level is below the barrier level, the payment you receive at maturity may be significantly below the stated principal amount of your notes and may be as little as USD \$1.00.</b></p>
<b>Minimum payment</b>	USD \$1.00
<b>Additional tax information</b>	<p>For information about the Canadian federal income tax considerations associated with an investment in the notes, see “Tax Considerations – Certain Canadian Federal Income Tax Considerations” in the income product supplement.</p> <p>The notes are denominated in U.S. dollars. For information about the Canadian federal income tax considerations associated with an investment in a note denominated in a foreign currency, see “Tax Considerations – Certain Canadian Federal Income Tax Considerations – Currency Conversion” in the income product supplement.</p> <p>For information about the eligibility of the notes for investment for certain registered plans, see “Eligibility for Investment” in the income product supplement.</p>
<b>Fundserv code</b>	JHN17590
<b>Calculation agent</b>	BMO Capital Markets
<b>Dealer</b>	BMO Nesbitt Burns Inc., an affiliate of ours, and Raymond James Ltd., acting as an independent dealer.
<b>Secondary market/early trading charge</b>	<p>The notes will not be listed on any securities exchange. BMO Capital Markets will use reasonable efforts under normal market conditions to provide for a daily secondary market for the sale of the notes through the order entry system operated by Fundserv Inc. but reserves the right to elect not to do so in the future, in its sole and absolute discretion, without prior notice to you. Sale requests need to be initiated by 1:00 p.m. (Toronto time, or such other time as may hereafter be established by us or Fundserv) on a business day. Any request received after such time will be deemed to be a request sent and received in respect of the next following business day. Sale of a Fundserv Note will be effected at a price equal to the bid price for the note, determined by us in our sole and absolute discretion. No early trading charge will apply if the notes are sold prior to maturity.</p> <p>See “Supplemental Plan of Distribution”, in the pricing supplement.</p>

84	January 2, 2031	January 2, 2031	January 9, 2031

\* If a scheduled coupon observation date or autocall observation date is not an exchange day for any reason, then such date will be the immediately preceding exchange day. Further, such dates are each also subject to postponement if a market disruption event occurs.

\*\* Each coupon payment date and autocall payment date is subject to postponement if such date is not a business day or a market disruption event occurs.

## How do the Notes work?

The following hypothetical examples demonstrate how the payment you may receive will be calculated and determined under four different scenarios. **The hypothetical closing levels used in these examples are for illustrative purposes only and should not be construed in any way as estimates or forecasts of the future performance of the reference asset or the return that you might realize on the notes.** All hypothetical examples assume that no events described under “Certain Additional Terms for Notes Linked to a Reference Index” in the income product supplement have occurred during the term. For ease of analysis, figures below have been rounded.

Barrier level/Coupon payment level	Autocall level
70% of the initial level	105% of the initial level

### Example 1: Payment at Maturity (Negative Scenario)

### Investor cash flow summary per note

1) Principal amount paid	USD \$100.00
2) Total coupons received	USD \$1.785
3) Maturity payment received	USD \$53.00
4) Total amount received = (2) + (3)	USD \$54.785
5) Return on the notes (annualized)	-8.23%

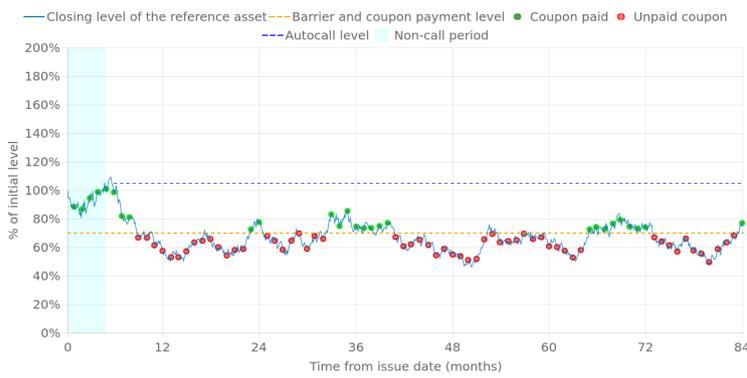

In this hypothetical example, the closing level is below the autocall level on all autocall observation dates, so the notes are not redeemed early. Furthermore, it is above the coupon payment level on the first and second coupon observation dates and below the coupon payment level on all the others, so you would receive two of the coupon payments.

Lastly, the final level is at 53.00% of the initial level, which is below the barrier level, so the final reference asset return is -47.00%. Accordingly, you would receive a maturity payment of USD \$53.00 per note with coupons totalling USD \$1.785 per note over the term of the notes (which is equivalent to a compounded annual loss of 8.23% on the notes).

In this example, the maturity payment is calculated as follows:

$$\begin{aligned}
 \text{Maturity payment} &= \text{USD } \$100.00 + (\text{USD } \$100.00 \times \text{final reference asset return}) \\
 &= \text{USD } \$100.00 + (\text{USD } \$100.00 \times -47.00\%) \\
 &= \text{USD } \$53.00
 \end{aligned}$$

### Example 2: Payment at Maturity (Neutral Scenario)

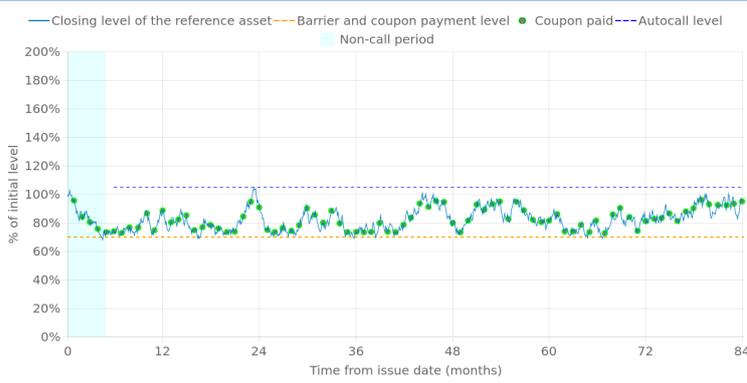

In this hypothetical example, the closing level is below the autocall level on all autocall observation dates, so the notes are not redeemed early. Furthermore, it is above the coupon payment level on twenty-seven of the coupon observation dates and below the coupon payment level on all the others, so you would receive twenty-seven of the coupon payments.

Lastly, the final level is at 77.00% of the initial level, which is above the barrier level, so the final reference asset return is -23.00%. Accordingly, you would receive a maturity payment equal to the principal amount with coupons totalling USD \$24.0975 per note over the term of the notes (which is equivalent to a compounded annual return of 3.13% on the notes).

### Investor cash flow summary per note

<b>1) Principal amount paid</b>	USD \$100.00
<b>2) Total coupons received</b>	USD \$24.0975
<b>3) Maturity payment received</b>	USD \$100.00
<b>4) Total amount received = (2) + (3)</b>	USD \$124.0975
<b>5) Return on the notes (annualized)</b>	3.13%

### Example 3: Payment at Maturity (Positive Scenario)

In this hypothetical example, the closing level is below the autocall level on all autocall observation dates, so the notes are not redeemed early. Furthermore, it is above the coupon payment level on all of the coupon observation dates, so you would receive all of the coupon payments.

Lastly, the final level is at 95.00% of the initial level, which is above the barrier level, so the final reference asset return is -5.00%. Accordingly, you would receive a maturity payment equal to the principal amount with coupons totalling USD \$74.97 per note over the term of the notes (which is equivalent to a compounded annual return of 8.31% on the notes).

### Investor cash flow summary per note

<b>1) Principal amount paid</b>	USD \$100.00
<b>2) Total coupons received</b>	USD \$74.97
<b>3) Maturity payment received</b>	USD \$100.00
<b>4) Total amount received = (2) + (3)</b>	USD \$174.97
<b>5) Return on the notes (annualized)</b>	8.31%

### Example 4: Automatic Early Redemption

### Investor cash flow summary per note

<b>1) Principal amount paid</b>	USD \$100.00
<b>2) Total coupons received</b>	USD \$8.0325
<b>3) Maturity payment received (early redemption)</b>	USD \$100.00
<b>4) Total amount received = (2) + (3)</b>	USD \$108.0325
<b>5) Return on the notes (annualized)</b>	10.84%

In this hypothetical example, the closing level is below the autocall level on all autocall observation dates until the ninth observation date. This results in the notes being redeemed early on the autocall payment date corresponding with the ninth observation date. Furthermore, it is above the coupon payment level on nine of the coupon observation dates, so you would receive nine of the coupon payments before the notes are redeemed.

Lastly, the closing level is at 111.00% of the initial level, which is above the autocall level, so the reference asset return is 11.00% and the notes are redeemed early for a value of USD \$100.00. Accordingly, you would receive a maturity payment equal to the principal amount with coupons totalling USD \$8.0325 per note over the term of the notes (which is equivalent to a compounded annual return of 10.84% on the notes).

## Disclaimer

This document should be read in conjunction with Bank of Montreal's short form base shelf prospectus dated May 25, 2023 (the "base shelf prospectus"), the income notes prospectus supplement dated May 25, 2023 (the "income product supplement") and pricing supplement No. 524 dated December 27, 2023 (the "pricing supplement"), each as amended or supplemented.

Amounts paid to you will depend on the performance of the reference asset. The notes are not designed to be alternatives to fixed income or money market investments. Bank of Montreal does not guarantee that you will receive any return or repayment of your principal investment in the notes at maturity, subject to the minimum payment amount of USD \$1.00 per note. The notes provide contingent protection only, meaning that you could lose some or substantially all of your principal investment in the notes if the final reference asset level is below 70.00% of the initial level on the final valuation date. See "Certain Risk Factors" in the base shelf prospectus, "Risk Factors" in the income product supplement and "Risk Factors" in the pricing supplement.

Prospective purchasers should carefully consider all of the information set forth in the pricing supplement, the income product supplement and the base shelf prospectus and, in particular, should evaluate the specific risk factors set forth under "Risk Factors" in the income product supplement and "Risk Factors" in the pricing supplement.

BMO Nesbitt Burns Inc. is a wholly-owned subsidiary of Bank of Montreal. As a result, Bank of Montreal is a "related issuer" of BMO Nesbitt Burns Inc. for the purposes of National Instrument 33-105 — *Underwriting Conflicts*.
