NON-IFRS FINANCIAL MEASURES

Net earnings attributable to participating shareholders are comprised of:

- Adjusted net earnings attributable to participating shareholders; and
- Adjustments, which include the after-tax impact of any item that in management's judgment, including those identified by management of its publicly traded operating companies, would make the period-over-period comparison of results from operations less meaningful. Includes the Corporation's share of Lifeco's impact of actuarial assumption changes and other management actions, direct equity and interest rate market impacts on insurance and investment contract liabilities net of hedging, as well as items that management believes are not indicative of the underlying business results which include those identified by a subsidiary or a jointly controlled corporation. Items that management and management of its subsidiaries believe are not indicative of the underlying business results include restructuring or reorganization costs, integration costs related to business acquisitions, material legal settlements, material impairment charges, impact of substantially enacted income tax rate changes and other tax impairments, certain non-recurring material items, and net gains, losses or costs related to the disposition or acquisition of a business.

Management uses these financial measures in its presentation and analysis of the financial performance of Power Corporation and believes that they provide additional meaningful information to readers in their analysis of the results of the Corporation. Adjusted net earnings, as defined by the Corporation, assist the reader in comparing the current period's results to those of previous periods as it reflects management's view of the operating performance of the Corporation and its subsidiaries and excludes items that are not considered to be part of the underlying business results.

Adjusted net asset value is commonly used by holding companies to assess their value. Adjusted net asset value is the fair value of the assets of the combined Power Corporation and Power Financial holding company balance sheet, the gross asset value, less their net debt and preferred shares. The investments held in public entities (including Lifeco, IGM and GBL) are measured at their market value and investments in private entities and investment funds are measured at management's estimate of fair value. This measure presents the fair value of the net assets of the holding company to management and investors, and assists the reader in determining or comparing the fair value of investments held by the holding company or its overall fair value.

Adjusted net earnings attributable to participating shareholders, adjusted net asset value, gross asset value, adjusted net earnings per share and adjusted net asset value per share are non-IFRS financial measures and ratios that do not have a standard meaning and may not be comparable to similar measures used by other entities.

Presentation of Holding Company Activities

The Corporation's reportable segments include Lifeco, IGM and GBL, which represent the Corporation's investments in publicly traded operating companies. These reportable segments, in addition to the asset management and holding company activities, reflect Power Corporation's management structure and internal financial reporting. The Corporation evaluates its performance based on the operating segment's contribution to earnings.

The holding company activities comprise the corporate activities of the Corporation and Power Financial, on a combined basis, and present the investment activities of the Corporation as a holding company. The investment activities of the holding company, including the investments in Lifeco, IGM and controlled entities within the alternative asset investment platforms, are presented using the equity method. The holding company activities also present the corporate assets and liabilities managed, including the cash and non-participating shares. The discussions included in the sections "Financial Position" and "Cash Flows" of the Corporation's most recent MD&A present the segmented balance sheet and cash flow statement of the holding company; these non-consolidated statements are presented in Note 19 of the Corporation's Interim Consolidated Financial Statements. This presentation is useful to the reader as it presents the holding company's (parent) results separately from the results of its consolidated operating subsidiaries.

[3] Includes the Corporation's investments in Portage I, Portage II and Wealthsimple, held by Power Financial.

[4] An additional deferred tax liability of $4 million has been included in the adjusted net asset value at September 30, 2022 ($80 million at December 31, 2021) with respect to the investments in standalone businesses at fair value, without taking into account possible tax planning strategies. The Corporation has tax attributes (not otherwise recognized on the balance sheet) that could be available to minimize the tax if the Corporation were to dispose of its interests held in the standalone businesses.

[5] In accordance with IAS 12, *Income Taxes*, no deferred tax liability is recognized with respect to temporary differences associated with investments in subsidiaries and jointly controlled corporations as the Corporation is able to control the timing of the reversal of the temporary differences and it is probable that the temporary differences will not reverse in the foreseeable future. If the Corporation were to dispose of an investment in a subsidiary or a jointly controlled corporation, income taxes payable on such disposition would be minimized through careful and prudent tax planning and structuring, as well as with the use of available tax attributes not otherwise recognized on the balance sheet, including tax losses, tax basis, safe income and foreign tax surplus associated with the subsidiary or jointly controlled corporation.

[6] At September 30, 2022, an additional deferred tax liability of $40 million ($39 million at December 31, 2021) has been included in the adjusted net asset value related to the investment in ChinaAMC at fair value.
