

MAGNA TO COOPERATE WITH FISKER ON ENGINEERING AND MANUFACTURING OF THE FISKER OCEAN

- Magna to contract manufacture Fisker Ocean in Europe
- Fisker to leverage Magna's EV architecture
- Magna portfolio scalable to meet future mobility needs

AURORA, Ontario, October 15, 2020 – As part of Magna's strategic direction to support traditional automakers as well as new entrants, the company announced today that it has signed agreements with Fisker Inc. that provide the framework for a platform sharing and manufacturing cooperation for the Fisker Ocean SUV. Fisker, an e-mobility automaker, announced plans to start production in the fourth quarter of 2022.

"We are very happy to be able to work with Fisker on such an exciting, sustainable product and to see what additional opportunities this cooperation may bring," said Swamy Kotagiri, President of Magna. "This is a great example of our strategy to leverage our strong portfolio to scale for future mobility needs and utilize our full vehicle engineering and manufacturing capabilities. This is a unique competitive position for us, particularly with new mobility players and OEMs seeking to expand their electrified offerings."

The Fisker Ocean will initially be manufactured exclusively by Magna in Europe. The vehicle will leverage Magna's EV architecture combined with the Fisker-Flexible Platform Adaptive Design (FF-PAD) to create a lightweight, aluminum intensive platform for the Fisker Ocean.

"Magna has a unique position in the industry with its market-leading innovative solutions combined with vehicle assembly capabilities that have produced more than 3.7 million vehicles from 30 different models," said Frank Klein, President Magna Steyr. Magna's proven capabilities, particularly in electric vehicles, form a strong basis to support Fisker with world class engineering and manufacturing of the Fisker Ocean."

As part of the cooperation, Fisker will issue Magna warrants to purchase shares currently representing approximately 6% of its equity.
