

NGEX MINERALS LTD.
MANAGEMENT'S DISCUSSION AND ANALYSIS
THREE AND SIX MONTHS ENDED JUNE 30, 2020
(Amounts in Canadian Dollars unless otherwise indicated)

The following management's discussion and analysis ("MD&A") of NGEx Minerals Ltd. ("NGEx Minerals" or the "Company") should be read in conjunction with the unaudited condensed interim consolidated financial statements for the three and six months ended June 30, 2020 and related notes therein. The financial information in this MD&A is reported in Canadian dollars unless otherwise indicated and is partly derived from the Company's condensed interim consolidated financial statements prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board, applicable to the preparation of interim financial statements, including IAS 34, *Interim Financial Reporting*. The effective date of this MD&A is August 27, 2020. Additional information about the Company and its business activities is available on SEDAR at www.sedar.com and the Company's website www.ngexminerals.com.

NGEx Minerals was incorporated on February 21, 2019 under the Canada Business Corporations Act in connection with a plan of arrangement to reorganize the business of Josemaria Resources Inc. ("Josemaria"), which was completed on July 17, 2019 (the "Josemaria Arrangement"). Accordingly, certain comparative information presented in this MD&A has been prepared on a continuity of interest basis of accounting, which requires that prior to July 17, 2019, the assets, liabilities and results of operations and cash flows of NGEx Minerals be on a 'carve-out' basis from the consolidated financial statements and accounting records of Josemaria, in accordance with the financial reporting framework specified in subsection 3.11(6) of National Instruments 52-107, *Acceptable Accounting Principles and Auditing Standards*, for carve-out financial statements. As the carve-out entity did not operate as a separate legal entity prior to July 17, 2019, the financial position, results of operations and cash flows do not necessarily reflect the financial position, results of operations and cash flows had the carve-out entity operated as an independent entity during the comparative periods presented (see Notes 2 and 3 of the Company's audited consolidated financial statements for the year ended December 31, 2019).

Some of the statements in this MD&A are forward-looking statements that are subject to risk factors set out in the cautionary note contained herein.

CORE BUSINESS

NGEx Minerals is a mineral exploration company with current exploration projects in Argentina and Chile. While the Company's current focus is copper-gold and gold projects in South America, going forward it may also consider other jurisdictions and commodities with an emphasis on the quality and value-creation potential of each opportunity rather than a strict commodity or geographic focus.

The Company's current flagship asset is its large copper-gold deposit, the Los Helados Project, located in Chile's Region III. The Company is the majority partner and operator of the Los Helados project, which is subject to a Joint Exploration Agreement with its partner, Pan Pacific Copper Co. Ltd. ("PPC").

The Company's strategy is to create value for its shareholders through prudent management and deployment of its capital resources, by expanding and increasing the quality of its mineral resources through successful exploration and acquisitions and by advancing the engineering and other studies that are required to prepare its projects for eventual development by the Company and its partners or by third parties. The overall objective is to position the Company as a top tier mineral exploration-development investment.

The Company has a strong management team and board with extensive experience in the resource sector, particularly in Chile and Argentina, where the Company's current exploration projects are located. The board and management team have an appropriate mix of geological, engineering, financial, and business skills to advance the Company's projects and to generate value for its shareholders.

The Company's most recent Mineral Resource estimate for the Los Helados Project, effective as of April 26, 2019, is comprised of 2.1 billion tonnes at 0.38% copper, 0.15 g/t gold and 1.37 g/t silver, containing 17.6 billion pounds of copper, 10.1 million ounces of gold and 92.5 million ounces of silver in the Indicated category, and an Inferred Mineral Resource estimate of 827 million tonnes at 0.32% copper, 0.10 g/t gold and 1.32 g/t silver for 5.8 billion pounds of copper, 2.7 million ounces of gold and 35.1 million ounces of silver.

The Company's common shares are listed on the TSX Venture Exchange under the symbol "NGEX".

Q2 2020 OPERATING HIGHLIGHTS

Ongoing Evaluation of Valle Ancho

Due to the seasonal nature of the Company's work programs, as well as COVID-19-related restrictions imposed by local health authorities in the Company's operating jurisdictions, Chile and Argentina, substantially all fieldwork at the Company's exploration properties ceased during the second quarter of 2020, with only minimal holding, administrative and maintenance costs incurred during the period.

Ongoing work with respect to the Company's mineral property interests during the period were primarily in relation to the Valle Ancho Project, where the Company conducted an initial exploration program, which ended in March 2020. The Valle Ancho Project consists of a significant land package in the Argentine Province of Catamarca, covering approximately 1,000 km² of underexplored and highly prospective ground, located on the Argentine side of Chile's renowned Maricunga Gold Belt. The initial exploration program at Valle Ancho consisted of a review of historical data, mapping and surface sampling, and the undertaking of an airborne geophysical survey over the project area to identify, develop and prioritize targets for further evaluation. Processing and interpretation of the results from the surface sampling and airborne geophysical surveys undertaken at the Valle Ancho Project was completed during the quarter. The field program was successful in outlining a number of targets for further work including: two large targets with outcropping porphyry copper mineralization, two targets with outcropping epithermal gold mineralization; and a copper skarn target.

Continuation of Business Development Initiatives

Another main operating objective for the Company during the three months ended June 30, 2020 was the continuation of its project generation and business development activities, which are directed towards identifying new projects for potential acquisition. The undertaking of these low cost, internal reviews align with the Company's goal of acquiring a significant new project but also with its implementation of cost saving measures in response to COVID-19, as well as its broader response to the health crisis. While at any given time discussions and activities may be in progress on a number of these potential acquisition targets, there is no assurance that these corporate activities will ever progress to the stage where a potential acquisition might be successfully completed.

OUTLOOK AND CONTINUED RESPONSE TO COVID-19

A key focus of the Company's recent 2019/2020 field program was the undertaking of an initial exploration program on the recently optioned Valle Ancho Project, located on the Argentine side of Chile's prolific Maricunga Gold Belt. The Company's exploration program at the Valle Ancho Project focused on review and compilation of historical data, analysis of satellite imagery, field examination, surface sampling and mapping of existing prospects, and the undertaking of an airborne geophysical survey over the project area to identify, develop and prioritize targets for further evaluation and potential drill testing. Analysis and interpretation of the exploration results is ongoing, and will guide the Company's path forward with this large and prospective land package. The Company has received expressions of interest in Valle Ancho from potential joint venture partners and will consider those options in conjunction with considering self funding further work.

In addition, the Company continues to pursue its project generation and business development initiatives, which are directed towards identifying new projects for potential acquisition. This is expected to be a significant focus for the Company going forward, as the Company seeks to leverage the strong ongoing support that it receives from its key shareholders and capitalize on opportunities arising from the ongoing COVID-19 health crisis and related economic turmoil.

The Company continues to respond to the COVID-19 pandemic within the framework of internal protocols, and local and national health authority requirements and recommendations. The health and safety of the Company's employees, contractors, visitors, and stakeholders remains NGEEx Minerals' top priority. The Company's project facilities and offices have implemented travel restrictions, surveillance, monitoring and response plans to reduce the risk of COVID-19 exposure and outbreak, including health screening of personnel when appropriate. All non-critical business travel has also been curtailed. The Company will continue to monitor the situation and is prepared to implement additional changes to minimize any potential impacts of the global outbreak that might emerge at the Company's project site or offices, as necessary.

In response to COVID-19, many governments of varying levels around the world have issued certain public health orders and travel restrictions, including the respective jurisdictions in which Company's headquarters and operating subsidiaries operate. Among other effects, such restrictions impact the Company's movement of people, its access to properties and facilities, and its general ability to conduct business in the normal course. The impacts to the Company to date have not been material, however going forward, they may result in changes to the timing and nature of the Company's operating plans.

As of the date of this MD&A, the government of Argentina has implemented certain travel restrictions to limit the spread of COVID-19. Per the latest Argentine government policy, any foreigner who is not a resident in Argentina will not be permitted to enter Argentina. In addition, travel restrictions have been imposed by certain provincial authorities on inter-provincial travel within Argentina. In Chile, the government has declared a 90-day state of emergency, which took effect March 19, 2020, and was renewed on June 16, 2020 for an additional 90 days. Effective March 18, 2020, Chile's borders are closed for entry. Chilean citizens and permanent residents are exempted and may still enter Chile at this time. All foreigners and Chileans entering Chile are subject to a mandatory 14-day self-quarantine.

The COVID-19-related health and safety regulations implemented by health officials in the Company's operating jurisdictions continue to evolve, and the Company has employed certain practices and procedures to stay abreast of, and remain adaptable to, the fluid situation. Such practices and procedures include, but are not limited to: analysis of alternate staffing schedules, rotations and accommodation arrangements; development of internal testing and quarantine protocols, including early identification of suitable quarantine locations; and regular dialogue with local government and health officials.

As of the date of this MD&A, the Company cannot yet determine the impact of the COVID-19 pandemic on its financial position, results of operations and cash flows for the year ending December 31, 2020 and beyond. The foregoing notwithstanding, as the Company's business plan is impacted by its ability to obtain financing through global financial markets, it is anticipated that should the COVID-19 pandemic and/or the general depression of financial markets persist, the Company's ability to access financing on favourable terms may be negatively impacted.

As part of its response to the COVID-19 crisis and the resulting global economic instability, the Company has implemented certain cost saving measures, including reductions to discretionary expenditures.

RESULTS FROM OPERATIONS

NGEEx Minerals is a junior exploration company and, as such, its net losses are largely driven by its exploration and project investigation activities and there is no expectation of generating operating profits until it identifies and develops a commercially viable mineral deposit.

Key financial results for the last eight quarters are provided in the table below.

Three Months Ended	Jun-20	Mar-20	Dec-19	Sep-19 ¹	Jun-19 ¹	Mar-19 ¹	Dec-18 ¹	Sep-18 ¹
Exploration costs (\$000's)	484	1,867	1,092	604	801	1,353	533	443
Operating loss (\$000's)	829	2,272	1,533	1,085	1,027	1,656	856	693
Net loss (\$000's)	843	2,070	1,549	1,074	1,034	1,650	960	706
Net loss per share, basic and diluted (\$)	0.01	0.02	0.01	0.01	0.01	0.01	0.01	0.01

¹ Amounts presented in the table relating to periods prior to July 17, 2019, the completion date of the Josemaria Arrangement, have been prepared and presented in accordance with the continuity of interest basis of accounting.

Due to the geographic location of the Company's mineral properties, the Company's business activities fluctuate with the seasons, through increased exploration activities during the summer months in South America. As a result, a general recurring trend is the increase in exploration expenditures, and therefore net losses, for the fourth quarter and first quarter of a fiscal year, relative to the second and third quarters. In addition, other relevant factors, such as the financial position of the Company, other corporate initiatives, as well as the type and scope of planned exploration/project work, could affect the level of exploration activities and net loss in a particular period.

NGEx Minerals incurred net loss of \$0.8 million and \$2.9 million, respectively, for the three and six months ended June 30, 2020 (2019: \$1.0 million and \$2.7 million), including operating losses of \$0.8 million and \$3.1 million, respectively (2019: \$1.0 million and \$2.7 million). Exploration and project investigation costs are the most significant expenditures of the Company and account for approximately 58% and 76% of the respective operating losses during the three and six months ended June 30, 2020 (2019: 78% and 80%). This is reflective of the Company's accounting policy to expense its exploration costs through the consolidated statement of comprehensive loss, except for mineral property option payments and mineral property acquisition costs, which are capitalized.

Exploration and project investigation costs for the three months ended June 30, 2020 were \$0.5 million (2019: \$0.8 million). The decrease in exploration and project investigation costs is generally the result of the cessation of field activity in the current period as a result of seasonality of the Company's projects and its COVID-19 response, as mentioned above. By comparison, during the 2019 comparative period, the Company continued environmental baseline studies at the Los Helados Project.

Exploration and project investigation costs for the six months ended June 30, 2020 were \$2.4 million (2019: \$2.2 million). The increase in exploration and project investigation costs is generally the result of the field program undertaken at the newly optioned Valle Ancho Project, which occurred during the first quarter of 2020. Namely, during the 2019/2020 field season, which ran until March 2020, the Company completed an initial exploration campaign at Valle Ancho, including field examination, surface sampling and mapping of existing prospects, and the undertaking of an airborne geophysical survey. In addition, the Company also continued ongoing environmental baseline data collection at Los Helados. By comparison, the 2018/2019 field program, which continued through March 2019, only focused on continuation of environmental baseline studies at the Los Helados Project, with minimal other field work conducted.

Excluding share-based compensation, administration costs for the three and six months ended June 30, 2020 totaled \$0.3 million and \$0.6 million, respectively (2019: \$0.2 million and \$0.4 million). Share-based compensation, a non-cash cost, reflects the amortization of the estimated fair value of options over their vesting period and is based to a large degree on the Company's share price and its volatility. The actual future value to the option holders may differ materially from these estimates as it depends on the trading price of the Company's shares if and when the options are exercised. In addition, as the granting of options and their vesting is at the discretion of the Board, the related expense is unlikely to be uniform across quarters or financial years. In addition, share-based compensation relating to periods prior to the completion of the Josemaria Arrangement on July 17, 2019, were allocated from amounts previously reported by Josemaria, and such allocations may not necessarily reflect, or be otherwise indicative of, the future financial performance of the Company.

Administration costs for the three and six months ended June 30, 2020 were higher than the 2019 comparative periods due primarily to higher compensation costs and management fees. The higher administration costs reflect the additional corporate costs associated with operating a stand-alone public entity following the completion of the Josemaria Arrangement on July 17, 2019. These increases were partially offset by lower administration costs incurred during the three months ended June 30, 2020, due to the Company's reduction to discretionary expenditures, as mentioned above, and due to temporary office closures during the quarter in response to COVID-19.

Also, the Company recognized a net monetary gain of \$6,116 during the three months ended June 30, 2020 (2019: loss of \$6,825), and a net monetary loss of \$17,588 during the six months ended June 30, 2020 (2019: \$965), in relation to the application of hyperinflationary accounting for the Company's Argentine subsidiaries, which began July 1, 2018. The monetary gains recognized are the results of changes in the Argentine price indices and changes to the Company's net monetary position during the respective periods. Further discussion regarding the application of hyperinflationary accounting has been provided in the notes to the condensed interim consolidated financial statements.

In addition, during 2020, the Company began acquiring and transferring marketable securities as a mechanism to facilitate intragroup funding transfers between its Canadian parent and its Argentine operating subsidiaries. Accordingly, for the six months ended June 30, 2020, the Company recognized a gain of \$246,882 (2019: \$nil) on the use of marketable securities for the purposes of facilitating intragroup funding transfers, which represents the net benefit of having used this funding mechanism over traditional methods.

No tax recovery is recognized as a result of the nature of the Company's activities and the lack of reasonably expected taxable profits in the near term.

In other comprehensive income, the Company reported a foreign currency translation gain of \$13,581 for the three months ended June 30, 2020 (2019: loss of \$99,994), and a foreign currency translation loss of \$227,937 for the six months ended June 30, 2020 (2019: \$117,980), on translation of subsidiary company accounts from their functional currency to the Canadian dollar presentation currency. For the three and six months ended June 30, 2020, the respective foreign currency translation gain and loss are primarily the result of fluctuations of the Canadian dollar relative to the Chilean peso over the respective periods. In addition, for the three and six months ended June 30, 2020, the impact of hyperinflation were losses of \$178,965 and \$72,885, respectively (2019: gains of \$80,071 and \$43,857), and consist of adjustments recognized on the continuing inflation of opening non-monetary balances during the respective periods and the ongoing translation of the Company's Argentine subsidiaries into the Canadian dollar presentation currency.

LIQUIDITY AND CAPITAL RESOURCES

As at June 30, 2020, the Company had cash of \$2.5 million and net working capital of \$2.4 million, compared to cash of \$5.6 million and net working capital of \$5.3 million, as at December 31, 2019. The decrease in the Company's cash and net working capital is due primarily to funds used in operations.

The Company plans to use the majority of its cash towards its key exploration projects in South America, its new business development efforts, and general corporate activities.

As an exploration company with no sources of revenue, the economic viability of the Company's long-term business plan is impacted by its ability to obtain financing, and global economic conditions impact the general availability of financing through public and private debt and equity markets, as well as through other avenues. Accordingly, the Company is cognisant of the current deterioration and heightened volatility of global financial markets coinciding with the COVID-19 pandemic and will continue reducing discretionary expenditures and exercising additional caution and prudence in the management and deployment of its current working capital.

Based on NGE Minerals' financial position at June 30, 2020, the Company anticipates the need for further funding to support ongoing operations and advancement of its South American projects, as appropriate. The Company is currently evaluating potential additional sources of financing. Historically, including the period prior to the completion of the Josemaria Arrangement, capital requirements have been primarily funded through equity financing, joint ventures, disposition of mineral properties and investments, and the use of short-term credit facilities extended by its major shareholders, such as Zebra Holdings and Investments S.à.r.l. ("Zebra") and Lorito Holdings S.à.r.l. ("Lorito"). Zebra and Lorito are companies controlled by a trust settled by the late Adolf H. Lundin. Zebra and Lorito report their respective security holdings in the Company as joint actors, as the term is defined by Canadian securities regulations, and are related parties by virtue of their combined shareholding in the Company in excess of 20%.

While management is confident that additional sources of funding will be secured to fund both required and planned discretionary expenditures for at least twelve months from June 30, 2020, factors that could affect the availability of financing include the progress and results of ongoing exploration at the Company's mineral properties, the state of international debt and equity markets, and investor perceptions and expectations of the global copper, gold, and/or silver markets. There can be no assurance that such financing will be available in the amount required at any time or for any period or, if available, that it can be obtained on terms satisfactory to the Company. If necessary, the Company may explore opportunities to revise the due dates of its liabilities, negotiate deferrals on upcoming lump sum payments with respect to the Company's mineral properties, and/or settle its liabilities through the issuance of the common shares and other equity instruments. Based on the actual deployment of the Company's current working capital and the amount of funding raised, if any, the Company's planned initiatives and other work programs may be postponed, or otherwise revised, as necessary.

RELATED PARTY TRANSACTIONS

Under the normal course of operations, the Company may undertake transactions or hold balances with related parties. Namely, the Company engages with Josemaria and Filo Mining Corp. ("Filo Mining"), related parties by way of directors, officers and shareholders in common, and MOAR Consulting Inc. ("MOAR"), an exploration consulting firm, of which a director of the Company is the president and proprietor.

Related party services

The Company has a cost sharing arrangement with Josemaria and Filo Mining. Under the terms of this arrangement, the Company provides management, technical, administrative and/or financial services (collectively, "Management Services") to Josemaria and Filo Mining, and vice versa. In addition, the Company engages MOAR, to provide exploration consultation. These transactions were incurred in the normal course of operations, and are summarized as follows:

	Three months ended		Six months ended	
	2020	June 30, 2019	2020	June 30, 2019
Management Services to Josemaria	47,183	56,981	88,287	104,408
Management Services to Filo Mining	101,950	78,771	257,342	144,744
Management Services from Josemaria	(51,438)	-	(93,597)	-
Management Services from Filo Mining	(112,978)	(101,961)	(245,369)	(180,507)
Exploration Consultation from MOAR	(40,625)	-	(78,750)	-

Related party balances

The amounts due from (to) related parties, and the components of the consolidated statement of financial position in which they are included, are as follows:

	Related Party	June 30, 2020	December 31, 2019
Receivables and other assets	Josemaria	13,390	16,848
Receivables and other assets	Filo Mining	33,873	57,490
Accounts payable and accrued liabilities	Josemaria	(40,266)	(102,675)
Accounts payable and accrued liabilities	Filo Mining	(32,779)	(64,222)
Accounts payable and accrued liabilities	MOAR	(17,656)	(17,656)

Key management compensation

The Company's key management personnel have the authority and responsibility for overseeing, planning, directing and controlling its activities and consist of the Board of Directors and members of the executive management team. Total compensation expense for key management personnel, and the composition thereof, is as follows:

	Three months ended		Six months ended	
	2020	June 30, 2019	2020	June 30, 2019
Salaries and other payments	89,500	46,825	208,000	157,152
Short-term employee benefits	3,573	1,705	8,249	3,669
Directors fees	20,500	9,268	41,000	15,932
Stock-based compensation	82,140	28,148	164,282	76,287
	195,713	85,946	421,531	253,040

SIGNIFICANT ACCOUNTING POLICIES

The Company continues to follow the accounting policies described in Note 4 to the consolidated financial statements for the year ended December 31, 2019, as on SEDAR at www.sedar.com.

CRITICAL ACCOUNTING ESTIMATES

The preparation of the consolidated financial statements in accordance with IFRS, such as the underlying condensed interim consolidated financial statements, requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and expenditures. These estimates and assumptions are based on management's best knowledge of the relevant facts and circumstances taking into account previous experience. Actual results could differ from those estimates and such differences could be material. Estimates are reviewed on an ongoing basis and are based on historical experience and other facts and circumstances. Revisions to estimates and the resulting effects on the carrying amounts of the Company's assets and liabilities are accounted for prospectively. There have been no material changes to the critical accounting estimates discussed in the annual 2019 MD&A filed on SEDAR at www.sedar.com on April 16, 2020.

FINANCIAL INSTRUMENTS

The Company's financial instruments consist of cash, receivables and other assets, trade payables and accrued liabilities, and the amounts due to its exploration partner. Other than for the amounts due to its exploration partner, the carrying values of the Company's financial instruments are considered to be reasonable approximations of fair value due to their short term nature. For amounts due to its exploration partner, the Company revalues the liability from time to time based on revisions to the timing and amounts of expected future settlement, which the Company believes is a reasonable approximation of fair value. Between revaluations, the liability is accreted.

As at June 30, 2020, the Company's financial instruments are exposed to the following financial risks, including credit, liquidity and currency risks:

- (i) Credit risks associated with cash is mitigated by the Company's practice of holding of the majority of its cash with a large Canadian financial institution that has been accorded a strong investment grade rating by a primary rating agency.
- (ii) Liquidity risks associated with the inability to meet obligations as they become due, as further discussed under the "Liquidity and Capital Resources" section above, is minimized through the management of its capital structure and by maintaining good relationships with significant shareholders and creditors. The Company also closely monitors and reviews its costs to date and actual cash flows on a monthly basis.

Based on the Company's financial position at June 30, 2020, the Company anticipates the need for further funding to support ongoing operations and advancement of its South American exploration projects, as appropriate. Please refer to the discussion provided in the Liquidity and Capital Resources section above for further details.

The maturities of the Company's financial liabilities as at June 30, 2020 are as follows:

	Total	Less than 1 year	1-5 years	More than 5 years
Accounts payable and accrued liabilities	444,367	444,367	-	-
Due to exploration partner	4,654,152	-	-	4,654,152
Total	5,098,519	444,367	-	4,654,152

Pursuant to the Josemaria Arrangement, the Company assumed from Josemaria an obligation to fund a partner's share of exploration expenditures related to the La Rioja properties (the "Obligation"). In accordance with the terms of a Joint Exploration Agreement between the Company and the partner, PPC, the Company has elected to settle the Obligation through funding PPC's share of exploration expenditures, which remained US\$3.4 million as at June 30, 2020, and has no defined timeline for settlement. The Obligation has been discounted and recorded at its present value at an annual effective rate of 8%.

- (iii) Foreign currency risk can arise when the Company or its subsidiaries transact or have net financial assets or liabilities which are denominated in currencies other than their respective functional currencies.

At June 30, 2020, the Company's largest foreign currency risk exposure existed at the level of its Canadian headquarters, where the Company held a net financial liability position denominated in US dollars having a Canadian dollar equivalent of approximately \$315,000. A 10% change in the foreign exchange rate between the US dollar, and the Canadian dollar, NGEx Minerals' functional currency, would give rise to increases/decreases of approximately \$31,000 in financial position/comprehensive loss.

OUTSTANDING SHARE DATA

As at August 27, 2020, the Company had 124,793,652 common shares outstanding and 5,475,000 share options outstanding under its share-based incentive plan.

RISKS AND UNCERTAINTIES

The operations of the Company are speculative due to the high-risk nature of its business, which includes the acquisition, financing, exploration, development and operation of mineral and mining properties. There are a number of factors that could negatively affect the Company's business and the value of its common shares, and these risk factors could materially affect the Company's future operations and financial position and could cause actual events to differ materially from those described in forward-looking statements relating to the Company. There have been no material changes in the risks and uncertainties affecting the Company that were discussed in the Company's annual 2019 MD&A, as filed on SEDAR at www.sedar.com on April 16, 2020.

QUALIFIED PERSON AND TECHNICAL INFORMATION

The scientific and technical disclosure included in this MD&A have been reviewed and approved by Bob Carmichael, P. Eng. (BC). Mr. Carmichael is the Company's Vice-President of Exploration and a Qualified Person under National Instrument 43-101 Standards of Disclosure for Mineral Projects. ("NI 43-101").

Mineral Resource estimates for the Los Helados Project have an effective date of April 26, 2019. The key assumptions, parameters, and methods used to estimate the mineral resources are contained in the 43-101 technical report for the project, entitled "*Technical Report on the Los Helados Porphyry Copper-Gold Deposit, Chile*", dated August 6, 2019 and authored by F. Devine, P.Geo., G. Zandonai, RMCMC, and G. Di Prisco, P.Geo. This report is available on the Company's website at www.ngexminerals.com or under the Company's profile at www.sedar.com.

The Company's Mineral Resource estimates as reported in this MD&A have been prepared in accordance with the CIM Definition Standards that are incorporated by reference in NI 43-101.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

Certain statements made and information contained herein in the MD&A constitutes "forward-looking information" and forward-looking statements" within the meaning of applicable securities legislation (collectively, "forward-looking information" or "forward-looking statements") concerning the business, operations, financial performance and condition of NEX Minerals. The forward-looking information contained in this MD&A is based on information available to the Company as of the date of this MD&A. Except as required under applicable securities legislation, the Company does not intend, and does not assume any obligation, to update this forward-looking information. Generally, any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance, (often, but not always, identified by words or phrases such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "projects", "estimates", "budgets", "scheduled", "forecasts", "assumes", "intends", "strategy", "goals", "objectives", "potential", "possible", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or statements that certain actions, events, conditions or results "will", "may", "could", "would", "should", "might" or "will be taken", "will occur" or "will be achieved" or the negative connotations thereof and similar expressions) are not statements of historical fact and may be forward-looking statements.

All statements other than statements of historical fact may be forward-looking statements. Forward-looking information is necessarily based on estimates and assumptions that are inherently subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of the Company to be materially different from those expressed or implied by such forward-looking information, including but not limited to: risks and uncertainties relating to, among other things, the inherent uncertainties regarding Mineral Resource estimates, cost estimates, changes in commodity prices, currency fluctuation, financings, unanticipated resource grades, infrastructure, results of exploration activities, cost overruns, availability of materials and equipment, timeliness of government approvals, taxation, political risk and related economic risk and unanticipated environmental impact on operations as well as other risks, and uncertainties and other factors, including, without limitation, those referred to in the "Risks and Uncertainties" section of the MD&A, and elsewhere, which may cause the actual results, level of activity, performance or achievements of the Company to be materially different from those expressed or implied by such forward-looking information.

The Company believes that the expectations reflected in the forward-looking statements and information included in this MD&A are reasonable but no assurance can be given that these expectations will prove to be correct and such forward-looking statements and information should not be unduly relied upon. This statement and information is as of the date of the MD&A. In particular, this MD&A contains forward-looking statements or information pertaining to: the assumptions used in the Mineral Resources estimates for the Los Helados Project, including, but not limited to, geological interpretation and grades; assumptions made in the interpretation of drill results, geology, grade and continuity of mineral deposits; expectations regarding access and demand for equipment, skilled labour and services needed for exploration and development of mineral properties; and that activities will not be adversely disrupted or impeded by exploration, development, operating, regulatory, political, community, economic and/or environmental risks. In addition, this MD&A may contain forward-looking statements or information pertaining to: the Company's ability to respond to or navigate, and/or methods by which it responds to or navigates, the COVID-19 pandemic; the expected timing, nature or results of the Company's recent business development initiatives; the expected nature or usefulness of results related to the Company's recently completed field season; potential of identifying prospective targets at the Valle Ancho Project that warrant further evaluation and potential drill testing; the results and impact of future exploration at the Valle Ancho Project; assumptions and interpretations around historical exploration results obtained in regards to the Valle Ancho Project; the exploration potential of the Valle Ancho Property; assumptions and interpretations around the Valle Ancho Project's location relative to the Maricunga Gold Belt and the potential correlation with respect to prospectivity; the timing, amount and duration of reductions to discretionary expenditures and salaries; the materialization of opportunities for the Company to make acquisition of strategic assets; the ability of the Company to secure additional financing and/or the quantum and terms thereof; exploration and development plans and expenditures; the timing and nature of work undertaken to advance the Los Helados Project; the success of future exploration activities; potential for the discovery of new mineral deposits; ability to build shareholder value; expectations with regard to adding to Mineral Resources through exploration; expectations with respect to the

conversion of inferred resources to an indicated resources classification; ability to execute the planned work programs; estimation of commodity prices, Mineral Resources, estimations of costs, and permitting time lines; ability to obtain surface rights and property interests; currency exchange rate fluctuations; requirements for additional capital; government regulation of mining activities; environmental risks; unanticipated reclamation expenses; title disputes or claims; limitations on insurance coverage; and other risks and uncertainties.

Forward-looking information is based on certain assumptions that the Company believes are reasonable, including that the current price of and demand for commodities will be sustained or will improve, the supply of commodities will remain stable, that the general business and economic conditions will not change in a material adverse manner, that financing will be available if and when needed on reasonable terms and that the Company will not experience any material labour dispute, accident, or failure of plant or equipment. These factors are not, and should not be construed as being, exhaustive. Although the Company has attempted to identify important factors that would cause actual results to differ materially from those contained in forward-looking information, there may be other factors that cause results not to be as anticipated, estimated, or intended. There can be no assurance that such statements will prove to be accurate, as the Company's actual results and future events could differ materially from those anticipated in such statements, as a result of the factors discussed in the "Risk and Uncertainties" section of this MD&A, and elsewhere. All of the forward-looking information contained in this document is qualified by these cautionary statements. Readers are cautioned not to place undue reliance on forward-looking information due to the inherent uncertainty thereof.

Statements relating to "Mineral Resources" are deemed to be forward-looking information, as they involve the implied assessment, based on certain estimates and assumptions, that the Mineral Resources described can be profitably produced in the future.
