7. LONG-TERM DEBT

On January 19, 2023, the Corporation entered into a credit agreement for a secured project financing facility with the European Bank for Reconstruction and Development ("EBRD") (the "Facility") to provide financing for the construction of the 2,000 tonne per day process plant (see note 5) for the Zgounder Silver Mine of up to \$100,000.

The Facility consists of a \$92,000 loan provided by the EBRD ("EBRD Tranche") and an \$8,000 tranche (pari-passu with the EBRD) by the Climate Investment Funds ("CTF") ("CTF Tranche"), managed by the EBRD. Amounts borrowed under the Facility incur interest at a rate of SOFR plus 5% for the EBRD Tranche and 9.31% for the CTF Tranche. Interest is paid twice every year on July 19 and January 19.

Interest rate on the CTF \$8,000 tranche is equal to the all-in rate at the time of signing reduced following achievement of three milestones:

- Milestone 1: Task Force on Climate-related Financial Disclosures ("TCFD") report was disclosed by end of 2023, therefore, has resulted in a 25% rate reduction bringing the interest down to 6.98% on the CTF Tranche;
- Milestone 2: Completion of certain capital expenditure set out in the TCFD report and in the development was completed by June 30, 2024, and will result in a 50% rate reduction.
- Milestone 3: Reaching "advanced" maturity on the TCFD's Climate Governance and Strategy recommendation was completed by June 30, 2024, and will result in a reduction of interest to an all-in rate of 1.00% effective July 1st, 2024.

The funds are available for a period of 24 months and a commitment fee representing 1.5% per annum for undrawn amounts during the availability period must be paid to the EBRD.

All debts under the facility are guaranteed by the Corporation and its subsidiaries and secured by the assets of the Corporation and pledges of the securities of the Corporation's subsidiary, ZMSM. ZMSM must maintain certain working capital ratios and adhere to other non-financial covenants. As at June 30, 2024 the ZMSM was in compliance with these covenants. From the second anniversary of the loan onward, ZMSM must also meet both a Forecast and an Historical Debt Service Coverage Ratio.

The long-term debt has been recorded at amortized cost, net of transaction costs, and will be accreted to face value over the life of the long-term debt using the effective interest rate method.

The Corporation paid a front-end commission, an underwriting fee, commitment charges and related transaction costs for a total of \$4,578 in transaction costs. As at June 30, 2024, \$3,964 of interest and commitment charges are included in accounts payable.

As at June 30, 2024, the full \$100,000 had been drawn under the Facility. In addition, a cost overrun account of \$18,000 is funded and included in restricted cash. Once the construction is over, the Corporation will transfer most of the balance to a Debt Service Reserve Account ("DSRA"). The Corporation must keep a balance up to \$16,250 in the DSRA and it will be held in restricted cash.

10. SEGMENTED INFORMATION

The Corporation's operations are within the mining industry and its major products are precious metals ingots and concentrate which are refined or smelted into pure silver and sold to global metal brokers. A reporting segment is defined as a component of the Corporation that:

- Engages in business activities from which it may earn revenues and incurs expenses;
- Whose operating results are reviewed regularly by the entity's executive management; and
- For which discrete financial information is available.

For the three and six-month periods ended June 30, 2024, the Corporation's reporting segments include the production segment, with its Zgounder silver project in Morocco. All other properties are segmented in the "non-producing properties" category (i.e. referred to as Exploration, evaluation and development segment) for the periods ended June 30, 2024 and December 31, 2023. The Corporate segment consists primarily of the Corporation's corporate assets including cash and cash equivalents, intercompany eliminations, and corporate expenses which are not allocated to operating segments.

Management evaluates segment performance based on mine operating earnings. Therefore, other income and expense items are not allocated to the segments. Significant information relating to the Corporation's reportable operating segments is summarized in the tables below.

- Increase the value of the Corporation's assets; and
- Achieve optimal returns to shareholders.

These objectives are achieved by operating its assets efficiently, identifying the right exploration and evaluation projects, adding value to these projects, and ultimately taking them to production or obtaining sufficient proceeds from their disposal. Management adjusts the capital structure as necessary to support the acquisition, exploration and evaluation and development of mineral properties. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Corporation's management team to sustain the future development of the business. As at June 30, 2024 managed capital is \$370,693 (\$278,393 December 31, 2023) representing external debt and total equity before non-controlling interest. To facilitate the management of its capital requirements, the Corporation prepares long-term cash flow projections that consider various factors, including successful capital deployment, general industry conditions and economic factors. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Corporation, is reasonable.

15. FINANCIAL RISK MANAGEMENT

The Corporation is exposed to various financial risks resulting from both its operations and its investment activities. There were no changes to the financial objectives, policies and processes during the three and six-month periods ended June 30, 2024 and 2023. The Corporation's main financial risks exposure and its financial risks management policies are as follows:

Credit risk

Credit risk refers to the risk of an unexpected loss if a party to its financial instrument fails to meet its contractual obligations. The Corporation's financial assets exposed to credit risk are primarily composed of cash and cash equivalents, accounts receivable, options contracts, and restricted cash. The Corporation's cash and cash equivalents and restricted cash are mostly held with reputable Canadian or Moroccan banks.

Credit risk arises from the possibility that the clients which the Corporation sells its product to may experience financial difficulties and be unable to fulfil their obligations. The Corporation requires that it is paid the majority of what it is owed on transfer of property and deals with creditworthy counterparties to mitigate the risk of financial loss from defaults. The Corporation monitors the credit risk of customers through credit rating reviews and constant communication with customers. The Corporation establishes an allowance for expected credit losses taking into account the credit risk of specific customers, historical trends and other information. As at June 30, 2024 and December 31, 2023, the Corporation sells its ingots and silver concentrated ore to a limited number of large customers and has never experienced a credit loss. Consequently, credit risk is considered to be limited. In management's opinion, the maximum credit risk exposure for all of the Corporation's current financial assets is the carrying value of those assets.

Commodity price risk

The Corporation's profitability is exposed to commercial risks notably those linked to the price of silver. The Corporation does not have financial instruments to hedge exposures to silver price fluctuations.

Liquidity risk

Liquidity risk refers to the risk that the Corporation will not be able to meet its financial obligations as they fall due. The Corporation's liquidity and operating results may be adversely affected if the Corporation's access to the capital market is hindered, whether as a result of a downturn in stock market conditions generally or related to matters specific to the Corporation. Over the years, the Corporation generates cash flow from its financing activities and from the sales realized at the Zgounder mine.

The following are the contractual maturities of financial liabilities and other liabilities, including interest where applicable as at June 30, 2024:

| | Carrying Amount | Contractual cash flows | 0-12 months | 12-24 months | More than 24 months |

15. FINANCIAL RISK MANAGEMENT (continued)

Foreign currency risk

In the normal course of operations, the Corporation is exposed to currency risk due to business transactions in foreign countries denominated in a currency other than the functional currency of each entity in the group, being the Canadian dollar for all the entities within the consolidated group except for AGSM, ZMSM, BGM and AGS, for which the functional currency is the Moroccan dirham, and for TIREX and ALGOLD S.A.R.L., for which the functional currency is the Mauritanian Ouguiya. Transactions related to the Corporation's exploration and evaluation activities are mainly denominated in Moroccan dirhams and Mauritanian ouguiyas.

Foreign currency denominated financial assets and liabilities which expose the Corporation to currency risk are presented below.

The Corporation enters into put option contracts to mitigate the risk of fluctuations in the exchange rate of its holdings of US dollars. Changes in the fair value of the contracts and the corresponding gains or losses are recorded quarterly and are included in the fair value adjustment on option contracts on the consolidated statement of comprehensive income (loss). The Corporation's management strategy is to reduce the risk of fluctuations associated with foreign exchange rate changes. The foreign currency option contracts are held to maturity and are either exercised for a net profit or loss; or expire at no obligation to the Corporation.

The fair value of option contracts, which represents the amount that would be received/(paid) by the Corporation if the contracts were terminated at June 30, 2024 was \$69 (\$145) as at December 31, 2023). As a June 30, 2024, the Corporation had cash collateral balances related to option contracts being held of \$nil (\$2,250 as at December 31, 2023). They are reflected as part of restricted cash in escrow in the consolidated statement of financial position.

Balances are dominated in US dollars, the presentation currency of the Corporation:

| June 30, 2024 | USD | EUR | MAD | Total |
|--|-----------------|----------------|----------------|-----------------|
| | \$ | \$ | \$ | \$ |
| Cash and cash equivalents | 27,773 | 212 | - | 27,985 |

| | (28,092) | (5,457) | (1,516) | (35,065) |

The impact on net earnings and equity of a 10% increase or decrease in foreign currencies on the Corporation's financial instruments based on balances on June 30, 2024 would be approximately \$8,043 (\$3,507 as December 31, 2023).

| | | 69 | (145) |

Fair value of financial instruments

Current financial instruments that are not measured at fair value are represented by cash and cash equivalents, accounts receivable, restricted cash, accounts payable and accrued liabilities, balance of purchase price payable and long-term debt. Their carrying values are considered a reasonable approximation of their fair value because of their short-term maturity and/or of the contractual terms of these instruments which have not changed significantly since their inception date.

Foreign currency options contracts

Foreign currency options contracts are recognized on the Corporation's consolidated statement of financial position when the Corporation becomes party to the contractual provisions of the instrument. The instrument is derecognized from the consolidated statement of financial position when the contractual rights or obligations arising from that instrument expire or are extinguished. Forward currency contracts are recognized at fair value through profit and loss. The variation of fair value is in the consolidated statement of comprehensive loss. The premium at inception is accounted for against the fair value of the instrument at each reporting date.

Fair value hierarchy

The following table classifies financial assets and liabilities that are recognized on the consolidated statement of financial position at fair value in a hierarchy that is based on significance of the inputs used in making the measurements. The levels in the hierarchy are:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- Level 3: Inputs for the asset or liability that are not based on observable market data.

| | \$ | \$ | \$ | \$ |
| Options contracts | - | 69 | - | 69 |

As at December 31, 2023, the following represents the classification of fair value instruments:

| | Level 1 | Level 2 | Level 3 | Total |
|-------------------|---------|---------|---------|-------|
| | \$ | \$ | \$ | \$ |
| Options contracts | - | (145) | - | (145) |

The Corporation's foreign currency option contracts are not traded in active markets. The fair value of these instruments has been determined using observable forward exchange rates. The effects of non-observable inputs are not significant for foreign contract positions.
