**BAUSCH + LOMB REPORTS NEARLY 27 MILLION UNITS OF CONTACT LENS MATERIALS
RECYCLED THROUGH ONE BY ONE RECYCLING PROGRAM**

LAVAL, Quebec, Nov. 12, 2020 – Bausch + Lomb, a leading global eye health business of Bausch Health Companies Inc. (NYSE/TSX: BHC) ("Bausch Health"), today announced that its exclusive ONE by ONE Recycling program has recycled nearly 27 million used contact lenses, top foils and blister packs since launching in November 2016. The program, made possible through a collaboration with TerraCycle®, a world leader in the collection and repurposing of hard-to-recycle post-consumer waste, has diverted more than 162,000 pounds of contact lens waste from oceans, lakes, streams and landfills.

“At Bausch Health, we continuously evaluate all aspects of our company to identify ways that we can achieve a more sustainable and regenerative state, while reducing our overall environmental footprint,” said Amy Butler, vice president, Global Environment, Health, Safety + Sustainability, Bausch Health. “We are proud to offer the ONE by ONE Recycling program to customers and contact lens wearers to help ensure these used materials do not end up in our environment.”

Today, more than 5,500 optometry practices are registered with the ONE by ONE Recycling program. To participate, contact lens wearers can bring their used contact lenses and packaging to one of these offices, which collects the used lens materials in a custom recycling bin provided by Bausch + Lomb. Once the bin is filled, the optometry practice will ship the materials to TerraCycle for proper recycling using a pre-paid shipping label.

“Millions of people wear contact lenses every day to help them see, but many do not realize the significant impact that these materials can have on the environment,” said Tom Szaky, founder and CEO, TerraCycle. “In just four years, we have recycled hundreds of thousands of these used materials, removing them from our environment, and instead using them to give back to the community. It is a program we’re proud to be part of and one we look forward to building upon in collaboration with Bausch + Lomb for years to come.”

Additionally, for every 10 pounds of material received from the ONE by ONE Recycling Program, TerraCycle donates \$10 to Optometry Giving Sight, an organization that funds programs that provide eye examinations and low-cost eyeglasses to people in need, including tens of millions of children with uncorrected myopia.

In 2019, Bausch + Lomb took the program one step further by repurposing the recycled waste and combining it with other recycled material to create custom training modules that were donated to the

Guide Dog Foundation, a national not-for-profit that trains guide dogs for people who are blind or visually impaired. The modules, which included benches, tables, waste stations and an agility ramp, are used to train the dogs and to further enhance the organization's Smithtown, New York campus for those who visit.

About TerraCycle

TerraCycle is an innovative waste management company with a mission to eliminate the idea of waste. Operating nationally across 21 countries, TerraCycle partners with leading consumer product companies, retailers and cities to recycle products and packages, from dirty diapers to cigarette butts, that would otherwise end up being landfilled or incinerated. In addition, TerraCycle works with leading consumer product companies to integrate hard to recycle waste streams, such as ocean plastic, into their products and packaging. Its new division, Loop, is the first shopping system that gives consumers a way to shop for their favorite brands in durable, reusable packaging. TerraCycle has won over 200 awards for sustainability and has donated over \$44 million to schools and charities since its founding more than 15 years ago and was named #10 in Fortune magazine's list of 52 companies Changing the World. To learn more about TerraCycle or get involved in its recycling programs, please visit www.terracycle.com.

About the ONE by ONE Recycling Program

Contact lens waste, including used lenses, foils and blister packs, is collected at eye care practices through special recycling bins provided by Bausch + Lomb and sent, postage-paid, to TerraCycle, where it is processed into raw material for the manufacture of new recycled products.

About Bausch + Lomb

Bausch + Lomb, a leading global eye health business of Bausch Health Companies Inc., is solely focused on helping people see better to live better. Its core businesses include over-the-counter products, dietary supplements, eye care products, ophthalmic pharmaceuticals, contact lenses, lens care products, ophthalmic surgical devices and instruments. Bausch + Lomb develops, manufactures and markets one of the most comprehensive product portfolios in the industry, which is available in approximately 100 countries.
