

Third Quarter 2018 Management's Discussion and Analysis

As of November 13, 2018

This management's discussion and analysis ("MD&A") of financial results and condition of Corridor Resources Inc. ("Corridor" or the "Company") for the three and nine months ended September 30, 2018 should be read in conjunction with Corridor's unaudited condensed financial statements and notes thereto for the three and nine months ended September 30, 2018, audited financial statements and notes thereto for the year ended December 31, 2017 and the MD&A for the year ended December 31, 2017 ("2017 Annual MD&A"), copies of which are available on the Company's website at www.corridor.ca and through the System for Electronic Document Analysis and Retrieval ("SEDAR") at www.sedar.com.

Additional information about Corridor, including its annual information form for the year ended December 31, 2017 (the "Annual Information Form"), is available on SEDAR at www.sedar.com. All amounts referred to in this MD&A are in Canadian dollars unless otherwise stated.

Introduction

Corridor is a Canadian junior resource company engaged in the exploration for and development and production of petroleum and natural gas onshore in New Brunswick and offshore in the Gulf of St. Lawrence. Corridor currently has natural gas production and reserves in the McCully Field near Sussex, New Brunswick. In addition, Corridor has a shale gas prospect in New Brunswick and an offshore conventional hydrocarbon prospect in the Gulf of St. Lawrence.

Selected Financial Information

<i>thousands of dollars except per share amounts</i>	Three months ended September 30		Nine months ended September 30	
	2018	2017	2018	2017
Sales	-	-	\$ 13,419	\$ 4,513
Net income (loss)	\$ (1,860)	\$ 3,826	\$ (6,418)	\$ 4,141
Net income (loss) per share – basic and diluted	\$ (0.021)	\$ 0.043	\$ (0.072)	\$ 0.047
Cash flow from operations ⁽¹⁾	\$ (867)	\$ (1,509)	\$ 8,965	\$ 892
Capital expenditures	\$ 307	\$ 127	\$ 1,530	\$ 300
Total assets	\$ 116,449	\$ 107,849	\$ 116,449	\$ 107,849

(1) "Cash flow from operations" is a non-IFRS financial measure; see "Non-IFRS Financial Measures".

Corridor's natural gas sales are priced at Algonquin city-gates ("AGT") near Boston, Massachusetts. In recent years, the AGT market has been characterized by excess demand during the winter season resulting in significant premiums in the sale price for natural gas during the winter season as compared to prices during other periods of the year. In response to this trend in natural gas prices, since 2015 Corridor has determined to shut-in most of its producing natural gas wells in the McCully Field in New Brunswick for a portion of the summer/fall period and to time the start-up of production, and the associated recovery of flush volumes, with peak winter pricing to maximize cash flow from operations and retain Corridor's reserves for production in future years. A key component of this production optimization strategy is to enter into financial hedges to mitigate the risks associated with the volatility of natural gas prices when natural gas production resumes after a shut-in period. In accordance with this strategy, Corridor shut-in its natural gas production starting in May 2018 and will resume partial production on November 14, 2018 with a plan to return to full production in December 2018.

Non-IFRS Financial Measures

This MD&A refers to "cash flow from operations" which is a financial measure that is not determined in accordance with International Financial Reporting Standards ("IFRS"). This measure does not have a standardized meaning and may not be comparable to similar measures presented by other companies. "Cash flow from operations" is used by the Company to analyse

operating performance, leverage and liquidity and is included in this MD&A because it is believed to facilitate the understanding of the results of Corridor's operations and financial position. Cash flow from operations represents cash provided by operating activities excluding the change in non-cash operating working capital, as follows:

<i>thousands of dollars</i>	Three months ended September 30		Nine months ended September 30	
	2018	2017	2018	2017
Cash provided by (used in) operating activities	\$ (652)	\$ (1,292)	\$ 11,795	\$ 2,346
Decrease in non-cash operating working capital	(215)	(217)	(2,830)	(1,454)
Cash flow from operations	\$ (867)	\$ (1,509)	\$ 8,965	\$ 892

Forward Looking Information

This MD&A contains certain forward-looking statements and forward-looking information (collectively referred to herein as "forward-looking statements") within the meaning of Canadian securities laws. All statements other than statements of historical fact are forward-looking statements. Forward-looking information typically contains statements with words such as "anticipate", "believe", "plan", "continuous", "estimate", "expect", "may", "will", "project", "should" or similar words suggesting future outcomes. In particular, this MD&A contains forward-looking statements pertaining to the following:

- production levels;
- business plans and strategies (including its production optimization and hedging strategies);
- timing of shut-in and start-up of production;
- exploration and development plans of Corridor;
- Canadian – U.S. dollar exchange rate;
- natural gas prices and premiums;
- reserves;
- future taxable profits;
- capital expenditures;
- sources of funding; and
- government regulation.

Statements relating to "reserves" are forward-looking statements, as they involve the implied assessment, based on certain estimates and assumptions that the reserves described, as applicable, exist in the quantities predicted or estimated and can profitably be produced in the future.

Undue reliance should not be placed on forward-looking statements, which are inherently uncertain, are based on estimates and assumptions, and are subject to known and unknown risks and uncertainties (both general and specific) that contribute to the possibility that the future events or circumstances contemplated by the forward-looking statements will not occur. There can be no assurance that the plans, intentions or expectations upon which forward-looking statements are based will in fact be realized. Actual results will differ, and the difference may be material and adverse to the Company and its shareholders.

Forward-looking statements are based on the Company's current beliefs as well as assumptions made by, and information currently available to the Company including information concerning anticipated financial performance, business prospects, strategies, regulatory developments, future natural gas and oil commodity prices, exchange rates, future natural gas production levels, the ability to obtain equipment in a timely manner to carry out development activities, the ability to market natural gas successfully to current and new customers, the impact of increasing competition, the ability to obtain financing on acceptable terms, the ability to add production and reserves through development and exploration activities and the terms of agreements with third parties (including the terms of its hedging contracts). Although management considers these assumptions to be reasonable based on information currently available to it, they may prove to be incorrect.

Unknown risks and uncertainties include, but are not limited to: risks associated with oil and gas exploration, development and production, operational risks, development and operating costs, substantial capital requirements and financing, volatility of natural gas and oil prices, government regulation, environmental, hydraulic fracturing, third party risk, dependence on key personnel, co-existence with mining operations, availability of drilling equipment and access, variations in exchange rates, expiration of licenses and leases, reserves estimates, trading of common shares, seasonality, disclosure controls and procedures and internal controls over financial reporting, competition, conflicts of interest, issuance of debt, title to properties, hedging, information systems, litigation, and aboriginal land and rights claims. Further information regarding these factors and additional factors may be found under the heading "Risk Factors" in the Annual Information Form. Readers are cautioned that the foregoing list of factors that may affect future results is not exhaustive.

The forward-looking statements contained in this MD&A are made as of the date hereof and the Company does not undertake any obligation to update publicly or to revise any of the included forward-looking statements, except as required by applicable law. The forward-looking statements contained herein are expressly qualified by this cautionary statement.

Q3 2018 Financial Summary

<i>thousands of dollars</i>	Three months ended September 30		Nine months ended September 30	
	2018	2017	2018	2017

Net income (loss)	\$ (1,860)	\$ 3,826	\$ (6,418)	\$ 4,141

Third Quarter Summary

- In 2018, management's production optimization strategy to shut-in wells at the McCully Field started in May and continued throughout Q3 2018, while in 2017, the shut-in started in April and continued throughout Q3 2017. As a result, Corridor had no natural gas production or natural gas sales in Q3 2018 or Q3 2017.
- Corridor's negative cash flow from operations in Q3 2018 decreased to \$867 thousand from a negative cash flow from operations of \$1,509 thousand in Q3 2017 due primarily to higher foreign exchange gains in Q3 2018 and higher interest income resulting from higher interest rates and increased short-term investments in Q3 2018. At September 30, 2018, Corridor had cash and cash equivalents of \$55,378 thousand and working capital of \$54,286 thousand and no outstanding debt.
- Corridor's net income decreased to a net loss of \$1,860 thousand in Q3 2018 from a net income of \$3,826 thousand in Q3 2017 due primarily to the net gain on disposition of \$5,589 thousand as a result of the compensation received of \$19.5 million from the Québec Government relating to a settlement agreement to end oil and gas exploration on Anticosti Island in Q3 2017.
- During the quarter, Corridor initiated a Normal Course Issuer Bid to purchase up to 6.8 million of Corridor's common shares. No common shares have yet been purchased.
- Subsequent to the quarter end, the Company entered into the following financial hedges: 2,500 mmbtupd for January 2019 at a fixed price of \$US12.72/mmbtu and 2,500 mmbtupd for February 2019 at an average fixed price of \$US12.50/mmbtu.

Results of Operations

Sales

<i>thousands of dollars</i>	Three months ended September 30		Nine months ended September 30	
	2018	2017	2018	2017
Natural gas	-	-	\$ 12,938	\$ 4,204
Condensate	-	-	77	47
Natural gas and gas liquids sales	-	-	13,015	4,251
Gathering, processing & transportation fees	-	-	404	262
Sales	-	-	\$ 13,419	\$ 4,513

Production volumes and pricing

	Three months ended September 30		Nine months ended September 30	
	2018	2017	2018	2017
Natural gas production (mmscf)	-	-	1,147	656
Natural gas production per day (mmscfpd)	-	-	4.2	2.4
Natural gas selling price (\$/mscf)	-	-	\$ 11.28	\$ 6.41

In 2018, management's production optimization strategy to shut-in wells at the McCully Field started in May and continued throughout Q3 2018, while in 2017, the shut-in started in April and continued throughout Q3 2017. As a result, Corridor had no natural gas production or natural gas sales in Q3 2018 or Q3 2017. Corridor will resume partial production on November 14, 2018 with a plan to return to full production in December 2018.

Natural gas sales increased to \$12,938 thousand for the nine months ended September 30, 2018 from \$4,204 thousand for the nine months ended September 30, 2017 due to the increase in the average natural gas sales price to \$11.28/mscf in the nine months ended September 30, 2018 from \$6.41/mscf in the nine months ended September 30, 2017 and the increase in the average daily natural gas production to 4.2 mmscfpd for the nine months ended September 30, 2018 from 2.4 mmscfpd for the nine months ended September 30, 2017. The increase in Corridor's average daily natural gas production is due primarily to the higher flush production achieved in Q1 2018 following the comprehensive shut-in of most of Corridor's natural gas wells at the McCully Field for an eight month period between April and December 2017 as compared to the flush production achieved in Q1 2017 after a more limited partial shut-in of natural gas production for a three month period between September and November 2016.

Corridor owns the midstream facilities which process and transport gas from the McCully Field to the Maritimes and Northeast Pipeline ("M&NP"). Third party gas flowing through these facilities, which currently is limited to Nutrien Inc.'s ("Nutrien") (formerly Potash Corporation of Saskatchewan Inc.) share of gas from the McCully Field, is charged a cost of service. The increase in the gathering, processing and transportation ("GPT") fees to \$404 thousand for the nine months ended September 30, 2018 from \$262 thousand for the nine months ended September 30, 2017 is due to an increase in Nutrien's share of natural gas production flowing through Corridor's gas plant in 2018.

Financial Derivatives Loss (Gain)

<i>thousands of dollars</i>	Three months ended September 30		Nine months ended September 30	
	2018	2017	2018	2017
Realized financial derivatives loss (gain)	-	-	\$ 1,398	\$ (1,094)
Change in unrealized loss (gain) on financial derivatives:				
Reversal of prior period unrealized loss (gain)	(724)	10	(1,512)	(253)
Current period calculation of unrealized loss (gain)	1,436	56	1,436	56
Financial derivatives loss (gain)	\$ 712	\$ 66	\$ 1,322	\$ (1,291)

A key component of Corridor's production optimization strategy is to enter into financial hedges to mitigate the risks associated with the volatility of natural gas prices when natural gas production resumes at the McCully Field after a shut-in period. Corridor had the following financial derivative contracts at September 30, 2018: 2,500 mmbtupd of natural gas production at a fixed price of \$US7.90/mmbtu for the period from December 1, 2018 to March 31, 2019 and 2,500 mmbtupd at a fixed price of \$US7.40/mmbtu for the period from December 1, 2018 to March 31, 2019. The calculation of the fair value of these contracts as of September 30, 2018, based on forecasted natural gas prices as of that date, resulted in the recognition of an unrealized loss on

financial derivatives of \$1,436 thousand for the three and nine months ended September 30, 2018 as compared to an unrealized loss on financial derivatives of \$56 thousand for the three and nine months ended September 30, 2017.

Royalty Expense

<i>thousands of dollars</i>	Three months ended September 30		Nine months ended September 30	
	2018	2017	2018	2017
Royalties	-	-	\$ 410	\$ 93
Royalty expense per mscf (\$/mscf)	-	-	\$ 0.36	\$ 0.14
Percentage of natural gas and gas liquids sales	-	-	3.2%	2.2%

Corridor's royalty expense increased to \$410 thousand for the nine months ended September 30, 2018 from \$93 thousand for the nine months ended September 30, 2017 due to higher natural gas sales in 2018.

Transportation Expense

<i>thousands of dollars</i>	Three months ended September 30		Nine months ended September 30	
	2018	2017	2018	2017
Transportation expense	-	-	\$ 100	\$ 428
Transportation expense per mscf (\$/mscf)	-	-	\$ 0.09	\$ 0.65

No transportation expenses were incurred during Q3 2018 and Q3 2017 due to the shut-in of wells at the McCully Field during these periods. Transportation expense decreased to \$100 thousand in the nine months ended September 30, 2018 from \$428 thousand in the nine months ended September 30, 2017 due in part to forward sale agreements in place for the delivery of natural gas production to the local Maritimes market as opposed to the New England market. The natural gas prices for the volumes sold under these forward sale agreements are based on natural gas prices at AGT but are subject to lower transportation expenses. Corridor had a forward sale agreement for the sale of 4,755 mmmbtup of its natural gas production to the local Maritimes market for the period from December 1, 2016 to March 31, 2017, and for substantially all of its natural gas production for the period from December 1, 2017 to April 30, 2018. As a result, transportation expense decreased to \$0.09/mscf for the nine months ended September 30, 2018 from \$0.65/mscf for the nine months ended September 30, 2017.

Production Expense

<i>thousands of dollars</i>	Three months ended September 30		Nine months ended September 30	
	2018	2017	2018	2017
Gross production expense	\$ 525	\$ 607	\$ 2,187	\$ 2,085
Third party recoveries	-	-	(259)	(179)
Net production expense	\$ 525	\$ 607	\$ 1,928	\$ 1,906
Net production expense per mscf (\$/mscf)	-	-	\$ 1.68	\$ 2.91

Gross production expense for Q3 2018 decreased to \$525 thousand from \$607 thousand for Q3 2017 due to lower repairs and maintenance in Q3 2018. Gross production expenses for the nine months ended September 30, 2018 increased to \$2,187 thousand from \$2,085 thousand for the nine months ended September 30, 2017 due to management's decision to produce in April 2018 which resulted in higher utilities and supplies expenses in April 2018. However, production expense per mscf decreased to \$1.68/mscf from \$2.91/mscf for the nine months ended September 30, 2017.

Third party recoveries increased for the three and nine months ended September 30, 2018 due to management's decision to produce in April 2018 while management had determined not to produce in April 2017.

Impairment Losses

<i>thousands of dollars</i>	Three months ended September 30		Nine months ended September 30	
	2018	2017	2018	2017
Impairment losses	\$ 40	-	\$ 11,408	-

In 2018, Corridor recognized impairment losses of \$11,408 thousand relating to costs incurred to date on the Old Harry prospect. The recognition of impairment losses resulted from the Company's decision to suspend any further technical and capital spending

on the Old Harry prospect after a comprehensive review revealed more complexity in the Old Harry prospect than previous analysis had suggested, which included the results of an integrated geotechnical analysis of a controlled source electromagnetic survey ("CSEM") survey and reprocessed 2D seismic. This comprehensive review revealed that the geology and geochemical/petrological analysis of the Old Harry structure was more complicated than previously understood. Corridor determined there was no longer a viable path to drilling an exploration well on the Old Harry prospect before the current exploration licence on the Newfoundland side expires in January 2021.

Depletion, Depreciation and Amortization

<i>thousands of dollars</i>	Three months ended September 30		Nine months ended September 30	
	2018	2017	2018	2017
Depletion, depreciation and amortization	\$ 56	\$ 42	\$ 3,624	\$ 2,045
Depletion, depreciation and amortization per mscf (\$/mscf)	-	-	\$ 3.47	\$ 3.46

Depletion expense is calculated using the unit-of-production method which is based on production volumes (excluding penalty wells) in relation to the proved reserve base. The increase in depletion, depreciation and amortization ("DD&A") expense to \$3,624 thousand for the nine months ended September 30, 2018 from \$2,045 thousand for the nine months ended September 30, 2017 is due to the increase in the net book value of the depletion asset base following the recognition of a reversal of impairment losses of \$12 million in Q4 2017.

General and Administrative Expenses

<i>thousands of dollars</i>	Three months ended September 30		Nine months ended September 30	
	2018	2017	2018	2017
Gross expenses	\$ 587	\$ 738	\$ 1,879	\$ 2,121
Capitalized overhead	(13)	(20)	(92)	(77)
Operator recoveries	-	-	(1)	-
Net expenses	\$ 574	\$ 718	\$ 1,786	\$ 2,044

Gross general and administrative ("G&A") expenses decreased to \$587 thousand in Q3 2018 from \$738 thousand during Q3 2017 and to \$1,879 thousand for the nine months ended September 30, 2018 from \$2,121 thousand for the nine months ended September 30, 2017 due to management's continued efforts to reduce costs.

Deferred Income Taxes

<i>thousands of dollars</i>	Three months ended September 30		Nine months ended September 30	
	2018	2017	2018	2017
Deferred income tax recovery	-	-	\$ (9)	-
Canadian statutory income tax rate	-	-	29.3%	-

The Company did not fully recognize deferred income tax recovery during the three and nine months ended September 30, 2018 or the three and nine months ended September 30, 2017 as it is not probable that there will be sufficient taxable profits and reversal of taxable temporary differences in the future to facilitate the utilization by the Company of the underlying tax-deductible amounts.

At September 30, 2018, the Company had approximately \$167 million of tax pools available to be applied against future taxable income. Based on planned capital expenditure programs and current natural gas price assumptions, the Company does not expect to be cash taxable for the foreseeable future.

Capital Expenditures

<i>thousands of dollars</i>	Three months ended September 30		Nine months ended September 30	
	2018	2017	2018	2017
Exploration, development and production	\$ 245	\$ 107	\$ 1,373	\$ 219
Capitalized overhead	13	20	92	77
Office and other assets	49	-	65	4
	\$ 307	\$ 127	\$ 1,530	\$ 300

The increase in capital expenditures to \$307 thousand in Q3 2018 from \$127 thousand in Q3 2017 and to \$1,530 thousand for the nine months ended September 30, 2018 from \$300 thousand for the nine months ended September 30, 2017 is primarily due to additional costs incurred on the CSEM survey and 2D seismic reprocessing over the Newfoundland and Labrador portion of the Old Harry prospect in 2018.

The Company does not plan to incur any significant capital expenditures in New Brunswick while the moratorium on hydraulic fracturing remains in place or any further capital expenditures on the Old Harry prospect.

Statement of Financial Position Changes

Significant changes between Corridor's September 30, 2018 and December 31, 2017 Statement of Financial Positions include:

- \$9,201 thousand increase in cash and cash equivalents, primarily reflecting the increase in natural gas sales in 2018,
- \$3,807 thousand decrease in receivables, primarily reflecting the shut-in of natural gas production as of May 2018,
- \$10,134 thousand decrease in exploration and evaluation assets, reflecting the recognition of impairment losses of \$11,408 thousand relating to the Old Harry prospect, net of additions in 2018,
- \$1,913 thousand decrease in accounts payable and accrued liabilities, primarily reflecting lower payables relating to the CSEM survey.

Cash Flow Summary

<i>thousands of dollars</i>	Three months ended September 30		Nine months ended September 30	
	2018	2017	2018	2017
Cash provided by (used in) operating activities	\$ (652)	\$ (1,292)	\$ 11,795	\$ 2,346
Cash provided by financing activities	39	-	39	13
Cash provided by (used in) investing activities	(102)	19,429	(2,633)	19,261
Increase(decrease) in cash and cash equivalents	\$ (715)	\$ 18,137	\$ 9,201	\$ 21,620

The increase in cash provided by operating activities to \$11,795 thousand for the nine months ended September 30, 2018 from \$2,346 thousand for the nine months ended September 30, 2017 is primarily due to the increase in natural gas sales in 2018.

The cash provided by investing activities decreased for the three and nine months ended September 30, 2018 due to the compensation received of \$19.5 million in Q3 2017 from the Québec Government relating to the settlement agreement to end oil and gas exploration on Anticosti Island.

Summary of Quarterly Information

<i>thousands of dollars, except per share amounts and average natural gas price</i>	2018			2017			2016	
	Three months ended			Three months ended			Three months ended	
	Sep. 30	Jun. 30	Mar. 31	Dec. 31	Sep. 30	Jun. 30	Mar. 31	Dec. 31
Natural gas sales	-	\$ 1,432	\$ 11,506	\$ 3,088	-	\$ 38	\$ 4,166	\$ 2,199
Net income (loss)	\$ (1,860)	\$ (10,127)	\$ 5,569	\$ 13,598	\$ 3,826	\$ (1,510)	\$ 1,825	\$ 12,316
Net income (loss) per share – basic and diluted	\$ (0.021)	\$ (0.114)	\$ 0.063	\$ 0.153	\$ 0.043	\$ (0.017)	\$ 0.021	\$ 0.139
Natural gas production (mmscfpd)	-	2.8	9.9	2.7	-	0.1	7.2	3.0
Average natural gas price (\$/mscf)	-	\$ 5.63	\$ 12.90	\$ 12.51	-	\$ 3.86	\$ 6.45	\$ 7.88
Capital expenditures	\$ 307	\$ 502	\$ 721	\$ 2,729	\$ 127	\$ 74	\$ 99	\$ 175

Corridor's natural gas sales are priced at AGT. The AGT market has been characterized by excess demand during the winter season resulting in significant premiums in the sale prices for natural gas during the winter season as compared to prices during other periods of the year. In response to this trend in natural gas prices, since 2015 Corridor has determined to shut-in most of its producing natural gas wells in the McCully Field in New Brunswick for a portion of the summer/fall period and to

time the start-up of production, and the associated recovery of flush volumes, with peak winter pricing to maximize cash flow from operations and retain Corridor's reserves for production in future years. A key component of this production optimization strategy is to enter into financial hedges to mitigate the risks associated with the volatility of natural gas prices when natural gas production resumes.

On May 27, 2016, the New Brunswick Government announced its decision to extend the moratorium on hydraulic fracturing for an indefinite period. This decision has resulted in reduced capital expenditures and lower expected future production and sales. In its reserves report dated March 1, 2017, in respect of the McCully Field effective as at December 31, 2016, GLJ Petroleum Ltd. ("GLJ") increased its estimate of future natural gas revenues resulting in the recognition of a reversal of impairment losses of \$12,700 thousand and a net income of \$12,316 thousand in Q4 2016. In 2017, GLJ further increased the estimate of future natural gas revenues in its reserves report effective as at December 31, 2017 resulting in the recognition of an additional reversal of impairment losses of \$12 million and net income of \$13,598 thousand in Q4 2017.

In Q2 2018, Corridor announced its decision to suspend any further technical work and capital spending on the Old Harry prospect which resulted in impairment losses of \$11,368 thousand and a net loss of \$10,127 thousand in Q2 2018.

Outstanding Share Information

As of October 31, 2018, the outstanding share information was as follows:

Common shares outstanding	88,761,965
Stock options to purchase common shares	3,100,000
Total common shares outstanding after exercise of all stock options	91,861,965
<i>thousands of dollars</i>	
Total proceeds due on exercise of all stock options	\$ 2,435

The weighted average exercise price for the stock options outstanding at October 31, 2018 was \$0.79.

Liquidity and Capital Resources

Corridor's liquidity depends upon cash flow from operations, supplemented as necessary by equity and debt financings and bank debt. At September 30, 2018, the Company was holding cash and cash equivalents of \$55,378 thousand and working capital of \$54,286 thousand. The Company has sufficient financial resources to undertake its planned activities in 2018 and assumes that no additional funds will be utilized from other sources such as equity financings, corporate debt or asset sales, recognizing that the Company does not plan to incur any significant capital expenditures in New Brunswick while the moratorium on hydraulic fracturing remains in place. Corridor does not presently have sufficient financial resources to undertake by itself the exploration and development of its properties or any additional properties that may be acquired in the future. Future exploration and development of the Company's properties will depend, therefore, on the termination of the moratorium in New Brunswick, the Company's cash flow from operations and its ability to obtain additional financing through joint ventures, debt financings, equity financings or other means. Failure to obtain any financing necessary for Corridor's capital expenditure plans may result in a delay in development or production on Corridor's properties.

Corridor's short-term investments consist of bank deposits with 90 days or less to maturity.

Given the Company's available liquid resources and the Company's current plans, management expects to have sufficient available funds to meet the current and foreseeable contractual obligations.

Disclosure Controls and Procedures and Internal Controls over Financial Reporting

The President and the Chief Financial Officer have designed, or caused to be designed under their supervision, disclosure controls and procedures and internal control over financial reporting to provide reasonable assurance that: (i) material information relating to the Company is made known to them, particularly during the period in which the annual filings are being prepared; and (ii) information required to be disclosed by the Company in its annual filings, interim filings or other reports filed or submitted by it under securities legislation is recorded, processed, summarized and reported within the time period specified in securities legislation.

The President and the Chief Financial Officer are responsible for establishing and maintaining disclosure controls and procedures and internal control over financial reporting to a standard which provides reasonable assurance on the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS. During the three months ended September 30, 2018, there were no changes in the Company's internal control over financial reporting that have materially affected, or are reasonably likely to affect, the Company's internal control over financial reporting. Internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with policies or procedures may deteriorate.

Critical Accounting Estimates

The preparation of financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities, revenues and expenses and disclosures of contingencies and commitments. Actual results could differ materially from those estimates. During the nine months ended September 30, 2018, there were no changes in the critical accounting estimates disclosed in Corridor's 2017 Annual MD&A.

Changes in Accounting Policies

Corridor's unaudited condensed financial statements for the nine months ended September 30, 2018 have been prepared in accordance with IFRS, as issued by the International Accounting Standards Board, and in accordance with IAS 34 – *Interim Financial Reporting*. These unaudited condensed financial statements have been prepared following the same accounting policies disclosed in note 3 of Corridor's audited financial statements for the year ended December 31, 2017, except for the following changes in accounting policies (for more information see note 3 of Corridor's unaudited condensed financial statements for the nine months ended September 30, 2018).

IFRS 15 "Revenue from Contracts and Customers"

The Company adopted IFRS 15 "*Revenue from Contracts and Customers*" ("IFRS 15") on January 1, 2018 using the retrospective method. IFRS 15 replaces IAS 18 "*Revenue*", IAS 11 "*Construction Contracts*" and some revenue related interpretations. The Company reviewed its various revenue streams and underlying contracts with customers using the IFRS 15 five-step model and determined there were no material changes to the measurement or the timing of the Company's revenues.

IFRS 9 "Financial Instruments"

The Company adopted IFRS 9 "*Financial Instruments*" ("IFRS 9") on January 1, 2018 which replaced IAS 39 "*Financial Instruments: Recognition and Measurement*" ("IAS 39"). The Company adopted the new standard using the retrospective method. The adoption of IFRS 9 did not have a material impact on the classification and measurement of the Company's financial assets and financial liabilities. The nature and effect of the key changes to the Company's accounting policies resulting from the adoption of IFRS 9 are summarized below.

Classification of Financial Assets and Financial Liabilities

IFRS 9 replaces the previous classification categories for financial assets under IAS 39 of held to maturity, loans and receivables, and available for sale with three new principal classification categories: amortized cost, fair value through other comprehensive income and fair value through profit or loss. The classification of financial assets under IFRS 9 is generally based on the contractual cash flows' characteristics and the business model for managing a financial asset. IFRS 9 had no substantive changes relating to the classification of financial liabilities.

Impairment of Financial Assets

IFRS 9 implements an expected credit loss model calculation and replaces the incurred credit loss calculation under IAS 39. Under IFRS 9, credit losses are expected to be recognized earlier than under IAS 39. The new impairment model applies to Corridor's financial assets measured at amortized costs and its adoption did not impact the valuation of the Company's financial assets.

The following is the new accounting standard that has been issued but is not yet effective.

IFRS 16 "Leases"

IFRS 16 "*Leases*" ("IFRS 16") will replace IAS 17 "*Leases*". The new standard will require the recognition of assets and liabilities for most leases on the Statement of Financial Position of the lessee. IFRS 16 is effective for annual periods beginning on or after

January 1, 2019, with earlier adoption permitted. The Company is in the process of evaluating the new standard and identifying all of its leases. The extent of the impact of adopting IFRS 16 has not yet been determined.

Business Conditions and Risks

An overview of the industry conditions in which the Company operates is set forth in the Annual Information Form under the heading "Industry Conditions".

The following is a summary of certain risk factors and should not be construed as exhaustive. There are numerous factors both known and unknown, that could cause actual results or events to differ materially from forecast results. Additional risk factors are included in the Annual Information Form under the heading "Risk Factors" and include development and operating costs, dependence on key personnel, co-existence with mining operations, availability of drilling equipment and access, expiration of licenses and leases, reserves and contingent resources estimates, trading of common shares, seasonality, disclosure controls and procedures and internal controls over financial reporting, competition, conflicts of interest, issuance of debt, title to properties, hedging, litigation, and aboriginal land and rights claims. See also "Forward-Looking Statements" in this MD&A.

Risks Associated with Oil and Gas Exploration, Development and Production

The long-term success of Corridor depends on its ability to find, acquire, develop and commercially produce oil and natural gas reserves. Without the continual addition of new reserves from exploration, development or acquisition activities, Corridor's existing reserves and production will decline over time. Production decline rates will vary by the type of reservoir, age of the wells and other factors and are not necessarily indicative of future performance. Future increases in Corridor's reserves will depend not only on its ability to explore and develop any properties it may have from time to time, but also on its ability to generate or raise sufficient capital to make the necessary investments to replace or expand its oil and natural gas reserves. Future oil and gas exploration may involve unprofitable efforts, not only from dry wells, but from wells that are productive but do not produce sufficient net revenues to return a profit after drilling, operating and other costs.

There is no assurance that expenditures made on future exploration, development or acquisition by Corridor will result in new discoveries of oil or natural gas in commercial quantities.

Operational Risks

Corridor's oil and natural gas operations are subject to all the risks and hazards typically associated with such operations, including hazards such as fire, explosion, blowouts, mechanical or pipe failure, cratering and oil spills, acts of vandalism, or other unexpected or dangerous conditions. Any of these hazards can interrupt operations, impact Corridor's reputation, cause a loss of life or personal injury, result in a loss of, or damage to, equipment or property and cause environmental damage that may include polluting water, land or air.

Oil and natural gas operations are also subject to all the risks typically associated with such operations, including drilling into unexpected formations or unexpected pressures, premature decline of reservoirs, the invasion of water into producing formations and sour gas from wells. Losses resulting from the occurrence of any of these risks may have a material adverse effect on Corridor's business, financial condition, results of operations and cash flows.

Substantial Capital Requirements and Financing

Substantial capital expenditures are required to finance the exploration, development and production of the Company's natural gas and oil properties and any other properties that may be acquired by the Company. The Company does not presently have sufficient financial resources to undertake by itself the exploration and development of its properties. The Company's cash flows from its reserves may not be sufficient to fund its ongoing activities at all times. If the Company's revenues or reserves decline, it may have limited ability to expend the capital necessary to undertake or complete future drilling programs. There can be no assurance that debt or equity financing or cash generated by operations will be available or sufficient to meet these requirements or for other corporate purposes or, if debt or equity financing is available, that it will be on terms acceptable to the Company. The inability of the Company to access sufficient capital for its operations could have a material adverse effect on the Company's financial condition, results of operations or prospects.

The Company does not presently have sufficient financial resources to undertake by itself the exploration and development of its properties. The exploration and development of the Company's properties depend, therefore, on Corridor's ability to obtain additional financing through joint ventures, debt financing, equity financing or other means. Failure to obtain any financing necessary for Corridor's capital expenditure plans may result in a delay in development or production of Corridor's properties. There can be no assurance that Corridor's efforts to raise such funding or to enter into a joint venture with a partner will be successful, or achieved on terms favourable to the Company or its existing shareholders. The failure of Corridor to obtain additional

financing or enter into a joint venture on a timely basis or on terms favourable to the Company could result in the loss or substantial dilution of the Company's interests (as existing or as proposed to be acquired) in its properties.

Volatility of Natural Gas and Oil Prices

Corridor's revenues, cash flows, results of operations and financial condition are dependent upon, among other things, the price it receives from the sale of its natural gas production. A substantial or extended decline in the price of natural gas or a continued low price environment for natural gas could have a material adverse effect on Corridor's revenues, cash flows, financial condition and the value of the Company's oil and natural gas reserves.

In recent years, the price of natural gas in North America has been declining. However, Corridor's natural gas production is sold to markets in New England, and more recently, the Maritimes, at prices referenced to AGT. The New England market and recently the Maritimes market, have in recent years been characterized by excess demand during the winter season resulting in elevated prices for natural gas as compared to depressed prices in other areas of North America, and this excess demand is expected to continue until new pipeline infrastructure is available to increase the supply of natural gas into this market, especially in light of declining natural gas production in Atlantic Canada. While numerous projects are planned which could alleviate the supply constraints to the New England market, it is not known whether the required regulatory approvals will be received and, if the projects proceed, the timing of completion of these projects.

Government Regulation

The oil and natural gas industry (exploration, production, pricing, marketing and transportation) is subject to extensive controls and regulations imposed by various levels of government. These regulations include, among other things, matters related to land tenure, drilling, production practices, environmental protection, royalties, carbon tax, marketing and pricing and various taxes and levies. Such regulations may be changed from time to time in response to economic or political conditions. The implementation of new regulations or the modification of existing regulations affecting the oil and gas industry could have a material adverse impact on Corridor's business, financial condition, results of operations and cash flows.

Environmental

Corridor's natural gas and oil operations are subject to significant environmental local, provincial and federal laws and regulations. Environmental legislation provides for, among other things, restrictions and prohibitions on spills and releases or emissions of various substances produced in association with oil and gas operations. The legislation also requires that wells and facility sites be constructed, operated, maintained, abandoned and reclaimed to the satisfaction of applicable regulatory authorities. Compliance with environmental legislation can require significant expenditures and failure to comply with these laws and regulations may result in the assessment of fines and penalties, orders to remediate property contamination and the issuance of injunctions that could limit or prohibit our operations, all of which could have a material impact on Corridor. The discharge of oil, natural gas or other pollutants into the air, soil or water may give rise to liabilities to governments and third parties and may require Corridor to incur costs to remedy such discharge. Changes in environmental laws and regulations may be enacted which could impose higher environmental standards which may increase the cost of the Company's operations and have a material adverse effect on our business, financial condition, results of operations and cash flows. No assurance can be given that future environmental laws and regulations will not adversely impact Corridor's ability to develop or operate its properties.

Corridor believes that it is reasonably likely that a trend towards stricter standards in environmental legislation will continue and the Company anticipates making increased expenditures of both a capital and an expense nature as a result of increasingly stringent environmental laws, and such legislation may have a material adverse effect on its business, financial condition, results of operations and cash flows.

Hydraulic Fracturing

Corridor utilizes hydraulic fracturing in connection with its drilling and completion activities in New Brunswick. There has been public concern over the hydraulic fracturing process. Most of these concerns have raised questions regarding the drilling fluids used in the fracturing process, their effect on fresh water aquifers, the use of water in connection with completion operations, the ability of such water to be recycled, and induced seismicity associated with fracturing. The U.S. and Canadian federal governments and certain U.S. state and Canadian provincial governments are currently reviewing certain aspects of the scientific, regulatory and policy framework under which hydraulic fracturing operations are conducted. At present, most of these governments are primarily engaged in the collection, review and assessment of technical information regarding the hydraulic fracturing process and, with the exception of increased chemical disclosure requirements in certain of the jurisdictions in which the Company operates, have not provided specific details with respect to any significant actual, proposed or contemplated changes to the hydraulic fracturing regulatory construct.

It is anticipated that federal, provincial and state regulatory frameworks to address concerns related to hydraulic fracturing will continue to emerge. While the Company is unable to predict the impact of any potential regulations upon its business, the

implementation of new laws, regulations or permitting regulations with respect to water usage or disposal, or hydraulic fracturing generally could increase the Company's costs of compliance, operating costs, the risk of litigation and environmental liability, or negatively impact the Company's production and prospects, any of which may have a material adverse effect on the Company's business, financial condition and results of operations.

The New Brunswick Government announced on May 27, 2016 that it would indefinitely continue a moratorium on hydraulic fracturing. Corridor believes that all wells on its properties in New Brunswick require hydraulic fracture stimulation to be commercially productive. As a result of this announcement, Corridor has determined that it will not undertake any drilling or completion activities or incur associated capital expenditures in New Brunswick until the moratorium is lifted. Should the moratorium not be lifted, Corridor's ability to maintain or increase production in the McCully Field and the ability to obtain a joint venture partner to develop the Frederick Brook prospect in the Elgin Sub-Basin will be materially and adversely affected.

Third Party Risk

In the normal course of its business, Corridor has entered into contractual arrangements with third parties which subject Corridor to the risk that such parties may default on their obligations. Corridor sells all of its production to large credit-worthy purchasers under normal industry payment terms.

Variations in Exchange Rates

The Company's sales of natural gas from the McCully Field are quoted in United States dollars. The Canadian/United States dollar exchange rate, which fluctuates over time, consequently affects the prices received by the Company. Any material increase in the value of the Canadian dollar will negatively impact the Company's natural gas revenues. This increase in the exchange rate for the Canadian dollar and future Canadian/United States exchange rates could accordingly impact the future value of the Company's reserves as determined by independent evaluators. The Company has not engaged in any risk management activities related to the Canada/United States exchange rate.

Information Systems

The Company relies on information technology, such as computer hardware and software systems, in order to properly operate its business. In the event the Company is unable to regularly deploy software and hardware, effectively upgrade systems and network infrastructure, and take other steps to maintain or improve the efficiency and efficacy of systems, the operation of such systems could be interrupted or result in the loss, corruption, or release of data.

In the ordinary course of business, the Company collects, uses and stores sensitive data, including intellectual property, proprietary business information and personal information of our employees and third parties. Despite our security measures, the Company's information systems, technology and infrastructure may be vulnerable to attacks by hackers and/or cyberterrorists or breaches due to employee error, malfeasance or other disruptions, including natural disasters and acts of war. Any such breach could compromise information used or stored on the Company's systems and/or networks and, as a result, the information could be accessed, publicly disclosed, lost or stolen. Any such access, disclosure or other loss of information could result in legal claims or proceedings, liability under laws that protect the privacy of personal information, regulatory penalties, operational disruption, site shut-down, leaks or other negative consequences, including damage to our reputation, which could have a material adverse effect on our business, financial condition, results of operations and cash flows.
