b) Deferred share units ("DSUs")

The Company has a DSU plan (the "DSU Plan") which provides for grants of DSUs to non-management directors. Each DSU vests on the date of grant; however, settlement of the DSU occurs when the individual ceases to be a director of the Company. DSUs are to be settled in cash or by payment in common shares acquired through the facilities of the TSX. It is the intention of the Company to settle DSUs in cash.

The following table summarizes the changes in the DSU liability for the periods:

	June 30, 2023	December 31, 2022
	\$	\$
Balance, beginning of period	825	196
Increase in liability/fair value adjustment ⁽¹⁾	793	629
Balance, end of period	1,618	825
Current portion of stock-based compensation payable	1,618	825

(1) Includes dividend adjustment.

The DSU liability as at June 30, 2023 of \$1.6 million is based on a fair value of \$6.35 per DSU which is the Company's closing share price on June 30, 2023.

The following table summarizes the changes in the number of outstanding DSUs for the periods:

	June 30, 2023	December 31, 2022
Outstanding, beginning of period	141	38
Granted	106	103
Outstanding, end of period	247	141

c) Share awards

The Company has an awards plan (the "Awards Plan") which provides for grants of RSUs and performance share units ("PSUs") to officers, employees and consultants of the Company. Generally, one third of the RSUs will vest on each of the first, second and third anniversaries of the date of grant and all PSUs will vest on the third anniversary of the date of grant, unless otherwise determined by the Board of Directors. The common shares underlying PSUs are adjusted based on a payout multiplier ranging from 0 to 2 times, which is determined based on certain corporate performance measures, as determined by the Board of Directors.

RSUs (Cash Settled)

During the six months ended June 30, 2023, the Board approved the cash settlement of RSUs. Previously, these awards had been accounted for as equity-settled. As a result of this modification to the Company's outstanding RSUs from equity-settled to cash-settled, the fair value of the awards previously expensed was reclassified from contributed surplus to stock-based compensation payable. Subsequent to modification, the grant date fair value is used to record the cost of the RSUs and any subsequent remeasurement of the liability is also recognized in the Statement of Income and Comprehensive Income.

The following table summarizes the changes in the RSU liability for the period:

	June 30, 2023
	\$
Balance, beginning of period	-
Reclassified from contributed surplus	563
Increase in liability/fair value adjustment ⁽¹⁾	368
Payout	(281)
Balance, end of period	650
Current portion of stock-based compensation payable	7
Long-term portion of stock-based compensation payable	643

(1) Includes dividend adjustment.

The RSU liability as at June 30, 2023 of \$0.7 million is based on a fair value of \$6.35 per RSU which is the Company's closing share price on June 30, 2023.

The following table summarizes the changes in the number of outstanding RSUs for the periods:

	June 30, 2023	December 31, 2022
Outstanding, beginning of period	179	-
Granted	212	183
Forfeited	(15)	(4)
Exercised	(47)	-
Outstanding, end of period	329	179

PSUs (Equity Settled)

It is the intention of the Company to equity settle PSUs. The Awards Plan allows a holder to receive common shares upon vesting. Headwater uses the fair value method for valuing PSUs. The fair value of PSUs is determined based on the volume weighted average trading price of the five days preceding the grant date. This fair value is recognized as stock-based compensation expense over the vesting period with a corresponding increase to contributed surplus. The Company capitalizes a portion of stock-based compensation that is directly attributable to development activities. For PSUs, the amount of stock-based compensation expense is adjusted based on a payout multiplier ranging from 0 to 2 times. The amount of stock-based compensation expense is reduced by an estimated forfeiture rate determined at the date of the grant and updated each period. Upon vesting of the PSUs and settlement in common shares, the previously recognized value in contributed surplus will be recorded as an increase to capital stock.

The following table summarizes the changes in the number of outstanding PSUs for the periods:

	June 30, 2023	December 31, 2022
Outstanding, beginning of period	838	-
Granted	1,020	838
Forfeited	(3)	-
Outstanding, end of period	1,855	838

12. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Financial instruments of the Company include cash and cash equivalents, restricted cash, accounts receivable, financial derivative receivable/liability, deposits, contribution receivable, accounts payable and accrued liabilities, dividends payable and repayable contribution. The Company is exposed to financial risks arising from its financial assets and liabilities that include credit risk and liquidity risk in addition to market risks associated with commodity prices and foreign exchange rates.

a) The Company is exposed to the following risks:

i) Commodity price risk

Headwater enters into financial derivative commodity contracts to manage the risks associated with fluctuations in commodity prices. All such transactions are conducted in accordance with the Company's established risk management policies. The Company does not use derivative financial instruments for

speculative purposes.

The Company had the following outstanding financial derivative commodity contracts as at June 30, 2023:

Commodity	Index	Type	Term	Daily Volume	Contract Price
Natural Gas	AECO 5A	Fixed	July 2023 - Oct 2023	3,000 GJ	Cdn\$3.53/GJ
Crude Oil	WCS Basis ⁽¹⁾	Differential	Oct 2023 - Dec 2023	3,000 bbl	US\$16.12/bbl

(1) WCS = Western Canadian Select

The following table summarizes the Company's financial derivative gains (losses) on commodity contracts for the periods:

	Three months ended June 30,		Six months ended June 30,	
	2023	2022	2023	2022
	\$	\$	\$	\$
Gains (losses) on financial derivatives:				
- realized gains (losses)	329	(258)	7,569	(4,203)
- unrealized gains (losses)	(913)	(2,801)	1,090	(2,931)
Gains (losses) on financial derivatives	(584)	(3,059)	8,659	(7,134)

The following table summarizes the fair value as at June 30, 2023 and the change in fair value for the six months ended June 30, 2023:

	Commodity contracts	Foreign exchange contracts	Total
	\$	\$	\$
Net financial derivative receivable/liability, beginning of period	(1,201)	100	(1,101)
Unrealized change in fair value ⁽¹⁾	1,090	(46)	1,044
Net financial derivative receivable/liability, end of period	(111)	54	(57)

(1) Unrealized change in fair value related to the Company's foreign exchange contracts is included in interest income and other expense.

The fair value of the financial derivative liability related to the Company's commodity contracts of \$0.1 million as at June 30, 2023 is based on estimated future natural gas and crude oil prices as of that date. The fair values of these financial derivative commodity contracts are sensitive to changes in the natural gas and crude oil reference prices. Holding other assumptions constant, if the AECO 5A price increased by 10% and the WCS differential to WTI decreased by 10%, the fair value of the financial derivative liability would increase (decrease) by \$0.6 million.

ii) Foreign currency risk

The Company is exposed to fluctuations of the Canadian to U.S. dollar exchange rate given realized pricing is directly influenced by U.S. dollar denominated benchmark pricing and from exposure to its U.S. dollar denominated heavy oil and natural gas marketing arrangements. At June 30, 2023, US\$0.3 million (December 31, 2022 - US\$0.2 million) of cash and US\$24.7 million (December 31, 2022 - \$25.4 million) of accounts receivable were denominated in U.S. dollars.

Headwater mitigates this risk by entering into commodity contracts in Canadian dollars and entering into foreign exchange contracts.

The Company had the following outstanding foreign exchange contract as at June 30, 2023:

Type	Buy Currency	Sell Currency	Rate	Notional Amount	Settlement Date
Forward contract	CAD	USD	June 2023 average ⁽¹⁾	US\$25.8 million	July 26, 2023

(1) WM/Reuters Intraday Spot Rate as of Noon EST

The fair value of the financial derivative asset related to the Company's foreign exchange contract of \$54 thousand as at June 30, 2023 is based on the CAD/US exchange rate as of that date. The fair value of this financial derivative contract is sensitive to changes in the reference CAD/US foreign exchange rates. Holding other assumptions constant, if the CAD/US exchange rate increased (decreased) by 1%, the fair value of the financial derivative asset would decrease (increase) by \$0.3 million.

Fair Value Measurement

The Company classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The Company maximizes the use of observable inputs when preparing calculations of fair value, where possible.

The fair value of cash and cash equivalents, restricted cash, accounts receivable, deposits, accounts payable and accrued liabilities and dividends payable approximate their carrying value due to the short term to maturity of these instruments. The repayable contribution has been discounted at an estimated market rate and therefore carrying value approximates fair value.

The Company's financial derivative receivable/liability is considered Level 2 in the fair value hierarchy.

iii) Credit risk

At June 30, 2023, 100% of the Company's accounts receivables were outstanding for less than 30 days. Trade receivables generally have a 30-day term and have all been collected subsequent to June 30, 2023. As at June 30, 2023, the Company's receivables consisted of \$37.6 million (December 31, 2022 - \$38.7 million) from crude oil and natural gas marketers, \$0.1 million from commodity contract counterparties (December 31, 2022 - \$3.5 million), \$0.1 million (December 31, 2022 - \$0.6 million) from its joint venture partner and \$0.3 million (December 31, 2022 - \$0.3 million) related to accrued interest and other.

iv) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company manages liquidity risk through its working capital and an actively managed operating and capital expenditure budgeting process. The Company entered into a \$100.0 million credit facility in the fourth quarter of 2022 to strengthen its liquidity. As at June 30, 2023, the Company held cash of \$129.0 million.

Credit Facilities

During the fourth quarter of 2022, the Company entered into an agreement with the National Bank of Canada and the Bank of Montreal (the "Lenders") providing for senior secured revolving syndicated credit facilities. The extendible revolving credit facilities are comprised of a \$20.0 million operating facility and an \$80.0 million syndicated facility.

As at June 30, 2023, Headwater had not drawn on the credit facilities.

The credit facilities have a revolving period of 364 days, extendible annually at the request of the Company, subject to approval of the Lenders. If not extended, the credit facilities will automatically convert to a term loan and all outstanding obligations will be repayable one year after the expiry of the revolving period. In the second quarter of 2023, the expiry of the revolving period was extended from December 8, 2023, to May 30, 2024. The borrowing

base is subject to semi-annual redeterminations occurring by May 31st and by November 30th of each year. The credit facilities are secured by a demand debenture in the amount of \$250.0 million. Repayments of principal are not required until the maturity date, provided that the borrowings do not exceed the authorized borrowing base and the Company is in compliance with all covenants, representations and warranties.

The credit facilities bear interest at a floating market rate with margins charged by the Lenders linked to the Company's senior debt to EBITDA ratio. EBITDA, for the purposes of calculating the senior debt to EBITDA ratio, is calculated as net income adjusted for non-cash items, interest expense and income taxes. Senior debt, for the purposes of calculating the senior debt to EBITDA ratio, is calculated as any debt of the Company excluding the financial derivative liability and repayable contribution.

The credit facilities are not subject to any financial covenants. Additionally, distributions are permitted subject to compliance with a Board approved distributions policy.

b) Management of capital

The Company's objectives when managing capital are to i) deploy capital to provide an appropriate return on investment to its shareholders; ii) maintain financial flexibility in order to preserve the Company's ability to meet financial obligations; and iii) maintain a capital structure that provides financial flexibility to execute strategic acquisitions. To aid in managing the capital structure, the Company monitors adjusted working capital and adjusted funds flow from operations.

On November 3, 2022, Headwater announced its inaugural quarterly cash dividend of \$0.10 per common share (\$0.40 per common share annualized). The first dividend was paid on January 16, 2023, to shareholders of record at the close of business on December 30, 2022. During the six months ended June 30, 2023, the Company declared \$47.1 million (six months ended June 30, 2022 - \$nil) related to its quarterly cash dividend.

The Company's strategy is designed to maintain a flexible capital structure consistent with the objectives as stated above and to respond to changes in economic conditions and the risk characteristics of the underlying crude oil and natural gas assets. Key indicators of changing economic conditions include adjusted working capital and adjusted funds flow from operations. Headwater considers its capital structure to include shareholders' equity and working capital. In order to maintain or adjust its capital structure, the Company may from time to time issue new common shares, seek debt financing, change its future dividend policy and adjust its capital spending to manage working capital.

In order to facilitate the management of its capital expenditures and working capital, the Company prepares annual budgets which are updated quarterly depending upon varying factors including current and forecast crude oil and natural gas prices, capital expenditures and general industry conditions. The annual and updated budgets are approved by the Board of Directors.

i) Adjusted working capital

Management considers adjusted working capital to be a key measure to assess the Company's liquidity and capital management.

	As at June 30, 2023	As at December 31, 2022
	\$	\$
Working capital	54,765	109,433
Contribution receivable (long-term)	1,104	1,104
Repayable contribution	(6,958)	(6,720)
Financial derivative receivable	(54)	(419)
Financial derivative liability	111	1,520
Adjusted working capital	48,968	104,918

ii) Adjusted funds flow from operations

Management considers adjusted funds flow from operations to be a key measure to assess the Company's management of capital. Adjusted funds flow from operations is an indicator as to whether adjustments are necessary to the level of capital expenditures. For example, in periods where adjusted funds flow from operations is negatively impacted by reduced commodity pricing, capital expenditures may need to be reduced or curtailed to preserve the Company's capital and dividend policy. Management believes that by excluding the impact of changes in non-cash working capital and adjusting for current income taxes in the period, adjusted funds flow from operations provides a useful measure of Headwater's ability to generate the funds necessary to manage the capital needs of the Company.

	Three months ended June 30,		Six months ended June 30,	
	2023	2022	2023	2022
	\$	\$	\$	\$
Cash flows provided by operating activities	66,857	84,728	127,058	145,417

Adjusted working capital and adjusted funds flow from operations are not standardized measures and therefore may not be comparable with the calculation of similar measures of other entities.
