#### **Third Quarter Results**

In Q3 2023, we estimate operating earnings per share of \$0.64-\$0.68 driven by profitable underwriting and enhanced investment income. Book value per share is estimated at \$12.55-\$12.59 and operating ROE is expected to exceed 20%.

We estimate reported net income will include a \$12 million (\$0.26 per share) after-tax loss from non-recurring items, including the negative impact of the run-off program. We estimate an additional negative after-tax impact of \$5 million (\$0.10 per share) driven primarily by unrealized losses on the investment portfolio, as well as other non-operating items.

#### **Fourth Quarter Impact of the Run-Off Program**

In Q4 2023, we estimate a negative after-tax impact to net income in the range of \$11 – \$14 million (\$0.23 - \$0.29 per share), driven by costs of protection, other run-off costs and mitigated by earned premium on the program.
