

Anconia Resources Corp. (an exploration stage Company)

Management Discussion & Analysis; for the three and nine months ended June 30, 2018

Anconia Resources Corp.

(An Exploration Stage Company)

**MANAGEMENT'S DISCUSSION & ANALYSIS OF THE UNAUDITED CONDENSED INTERIM
CONSOLIDATED FINANCIAL POSITION AND CONSOLIDATED RESULTS OF OPERATIONS**

For the three and nine months ended June 30, 2018

This MD&A is dated August 9, 2018

Anconia Resources Corp. (an exploration stage Company)

Management Discussion & Analysis; for the three and nine months ended June 30, 2018

Introduction

This Management Discussion and Analysis ("MD&A"), dated August 9, 2018 provides a review of the financial position and the results of operations of Anconia Resources Corp. (the "Corporation", "Anconia" or the "Company") and constitutes management review of the factors that affected the Company's financial and operating performance for the three and nine months ended June 30, 2018. This MD&A has been prepared in compliance with the requirements of National Instrument 51-102 – Continuous Disclosure Obligations. The review is provided to enable the reader to assess the significant changes in the financial condition of the Company as at and for the three and nine months ended June 30, 2018. This MD&A should be read in conjunction with the unaudited condensed interim consolidated financial statements for the three and nine months ended June 30, 2018 and the audited consolidated financial statements of the Company for the years ended September 30, 2017 and 2016 together with the notes thereto. The Company's financial statements and the financial information reported in this MD&A have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations of the IFRS Interpretations Committee ("IFRIC"). All amounts presented are stated in Canadian dollars, unless otherwise indicated. Information contained herein is presented as of May 30th, 2018, unless otherwise indicated.

For the purposes of preparing this MD&A, management, in conjunction with the Board of Directors, considers the materiality of information. Information is considered material if: (i) such information results in, or would reasonably be expected to result in, a significant change in the market price or value of Anconia's common shares; or (ii) there is a substantial likelihood that a reasonable investor would consider it important in making an investment decision; or (iii) it would significantly alter the total mix of information available to investors. Management, in conjunction with the Board of Directors, evaluates materiality with reference to all relevant circumstances, including potential market sensitivity.

Cautionary Note Regarding Forward-Looking Information

This MD&A contains certain forward-looking information and forward-looking statements, as defined in applicable securities laws (collectively referred to herein as "forward-looking statements"). These statements relate to future events or the Company's future performance. All statements other than statements of historical fact are forward-looking statements. Often, but not always, forward-looking statements can be identified by the use of words such as "plans", "expects", "is expected", "budget", "scheduled", "estimates", "continues", "forecasts", "projects", "predicts", "intends", "anticipates" or "believes", or variations of, or the negatives of, such words and phrases, or statements that certain actions, events or results "may", "could", "would", "should", "might" or "will" be taken, occur or be achieved. Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results to differ materially from those anticipated in such forward-looking statements. The forward-looking statements in this MD&A speak only as of the date of this MD&A or as of the date specified in such statement. The following table outlines certain significant forward-looking statements contained in this MD&A and provides the material assumptions used to develop such forward-looking statements and material risk factors that could cause actual results to differ materially from the forward-looking statements.

Anconia Resources Corp. (an exploration stage Company)

Management Discussion & Analysis; for the three and nine months ended June 30, 2018

Forward-looking statements	Assumptions	Risk factors
Potential of the Company's properties to contain economic deposits of precious and base metals.	Financing should be available for future exploration of the Company's properties; the actual results of the Company's exploration activities will be favourable; operating and exploration costs will not exceed the Company's expectations; the Company will be able to retain and attract skilled staff; all requisite regulatory and governmental approvals for exploration projects and other operations will be received on a timely basis upon terms acceptable to the Company, and applicable political and economic conditions are favourable to the Company; the price of precious and base metals and applicable interest and exchange rates will be favourable to the Company; no title disputes exist with respect to the Company's exploration and evaluation assets.	Precious and base metals price volatility; uncertainties involved in interpreting geological data and confirming title to acquired exploration and evaluation assets; the possibility that future exploration results will not be consistent with the Company's expectations; availability of financing for and actual results of the Company's exploration activities; increases in costs; environmental compliance and changes in environmental and other local legislation and regulation; interest rate and exchange rate fluctuations; changes in economic and political conditions; the Company's ability to retain and attract skilled staff; availability of permits.
The Company's ability to meet its working capital needs at the current level for the twelve-month period ending June 30, 2019. The Company expects to incur further losses in the development of its business.	The operating and exploration activities of the Company for the twelve-month period ending June 30, 2019 and beyond, and the costs associated therewith, will be dependent on raising sufficient additional capital consistent with the Company's current expectations.	Changes in debt and equity markets; timing and availability of external financing on acceptable terms; changes in the operations currently planned for the next twelve months; increases in costs; environmental compliance and changes in environmental and other local legislation and regulation; interest rate and exchange rate fluctuations; changes in economic conditions.
The Company's ability to carry out anticipated exploration on its exploration and evaluation assets.	The exploration activities of the Company for the next twelve months ending June 30, 2019, and the costs associated therewith, will be consistent with the Company's current expectations.	Changes in debt and equity markets; timing and availability of external financing on acceptable terms; increases in costs; changes in the operations currently planned for the next twelve months; environmental compliance and changes in environmental and other local legislation and regulation; interest rate and exchange rate fluctuations; changes in economic conditions; receipt of applicable permits.
Asset values for the three and nine months ended June 30, 2018.	Management believes that no further write-down is required for its exploration and evaluation assets resulting from	If the Company does not obtain equity or debt financing (or a combination of both) on terms favourable to the

	continuing efforts to raise capital (debt or equity, or a combination of both) to implement planned work programmes on the Company's projects.	Company or at all, a decline in asset values that could be determined to be other than temporary, may result in future impairment losses.
Management's outlook regarding future trends, including the future price of precious and base metals and availability of future financing.	Financing will be available for the Company's exploration and operating activities; the price of precious and base metals will be favourable to the Company.	Precious and base metals price volatility; changes in debt and equity markets; interest rate and exchange rate fluctuations; changes in economic and political conditions; availability of financing.
The Company will continue to focus its exploration efforts on existing targets located in Nunavut (known as the Atlas property) and its properties in Ontario known as the Grenfell property located in the Kirkland lake area, and the SSM 2016 property located in the Sault Ste Marie area	New targets that are not discovered will not take precedence over existing targets.	Management may change its plans based on future exploration results.
Sensitivity analysis of financial instruments.	Based on management's knowledge and experience of the financial markets, the Company has no significant risk as a result of a change in the foreign currency exchange rates or interest rates.	Changes in debt and equity markets; interest rate and exchange rate fluctuations.

Inherent in forward-looking statements are risks, uncertainties and other factors beyond the Company's ability to predict or control. Please also make reference to those risk factors referenced in the "Risks Factors" section below. Readers are cautioned that the above chart does not contain an exhaustive list of the factors or assumptions that may affect the forward-looking statements, and that the assumptions underlying such statements may prove to be incorrect. Actual results and developments are likely to differ, and may differ materially, from those expressed or implied by the forward-looking statements contained in this MD&A.

Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause the Company's actual results, performance or achievements to be materially different from any of its future results, performance or achievements expressed or implied by forward-looking statements. All forward-looking statements herein are qualified by this cautionary statement. Accordingly, readers should not place undue reliance on forward-looking statements. The Company undertakes no obligation to update publicly or otherwise revise any forward-looking statements whether as a result of new information or future events or otherwise, except as may be required by law. If the Company does update one or more forward-looking statements, no inference should be drawn that it will make additional updates with respect to those or other forward-looking statements, unless required by law.

Anconia Resources Corp. (an exploration stage Company)

Management Discussion & Analysis; for the three and nine months ended June 30, 2018

Background

Anconia Resources Corp. (formerly Citadel Gold Mines Inc.) was incorporated under the Ontario Business Corporation Act ("OBCA") on March 22, 1962. The fiscal year end of the Company is September 30.

On June 15, 2011 Anconia completed a reverse takeover transaction (the "Transaction") pursuant to which Anconia (then Citadel) acquired all of the issued and outstanding common shares (the "Purchased Shares") in the capital of 2215107 Ontario Inc. ("221"), a private Ontario company with an interest in a mineral property in Nunavut (the "Property"), from the shareholders of 221 (the "221 Shareholders"), and completed a private placement financing for gross proceeds of approximately \$3,510,100.

221 was incorporated under the OBCA on August 18, 2009 for the purpose of acquiring the Property. The Property was 221's sole material asset.

Concurrently with the closing of the Transaction, Anconia: changed its name from Citadel Gold Mines Inc. to Anconia Resources Corp.; consolidated its common shares on the basis of one (1) post-consolidation common share for every five (5) pre-consolidation common shares (the "Consolidation"); and completed a private placement of units and flow-through units for gross proceeds of approximately \$3,510,100 (the "Financing").

On closing of the Transaction: the 221 Shareholders were issued 12,276,000 Anconia Shares (on a post-Consolidation basis); MO-KAR Holdings Inc. received 613,800 Anconia Shares (on a post-Consolidation basis) as a finder's fee in connection with the acquisition of the Property, and 1,650,000 Anconia Shares (on a post-Consolidation basis) were issued to Dr. Bernard Sherman and to a company controlled by Dr. Sherman pursuant to the conversion of \$625,000 aggregate principal amount of convertible debentures previously issued to them.

Anconia is an exploration and development focused company. The Company currently has three exploration projects all of which are in Canada. One of the projects is in Nunavut and is known as the Atlas project (which is the consolidation of two contiguous projects The Marce and Zac property).. The second project is a recent acquisition known as the Grenfell property which is located in the Kirkland Lake area. The third project is the Sault Ste. Marie SSM 2016 property located in the Sault Ste Marie area which the Company acquired during fiscal 2016.

Exploration and Evaluation Assets

The Company completed the reverse takeover transaction to which Anconia acquired 221, a private Ontario company holding an option to acquire a 100% interest in certain mining claims – the Atlas properties (formerly known as the "ZAC property" and the "Marce property") – located in the Territory of Nunavut. The Atlas properties are located approximately 170 kilometres south of Baker Lake.

Currently there is \$50,000 outstanding in the option agreement on this property and the option holder has agreed to wait for payment on this until the Company is funded.

The following table is a list of Claim Units currently held in Nunavut

* Based on a confirmation received from the mining recorder of Nunavut this claim is held in good standing as they have an outstanding report in their office awaiting approval. This claim will be advanced by the report.

** During the year ended September 30, 2016, management and the Board of the Company decided not to renew these claims and impair the amounts capitalized in exploration and evaluation assets, regarding these claims

Atlas Properties

On May 30, 2011, Anconia filed a technical report on SEDAR titled "Technical Report on the Victory Lake Project District of Kivalliq Nunavut" authored by Howard Lahti and John C. Archibald dated October 20, 2010 and revised May 25, 2011, which examines the staked claims ZAC 1, 2 and 3. The present claim group is comprised of three unpatented mining claims of roughly four square kilometres each, for more than 7,231 acres. The claims are held in good standing and are registered in the name of Marcelle Hauseux.

The Marce property is located approximately 18 kilometers Southwest of the ZAC property and consists of four staked claims covering an area of approximately 23.4 square kilometers, encompassing a geophysical target (identified by large gravity, magnetic and electromagnetic anomalies) with an indicated strike length of approximately 1.3 kilometers which is open along strike.

221 holds an option to acquire a 100% undivided interest in the ZAC and Marce properties. The option is exercisable upon payment of \$250,000 (in staged payments over four years) and prior to exercise, 221 is responsible for incurring all costs, payments and expenses in order to keep these properties in good standing and to file all assessment work in a timely fashion.

On October 10, 2012 and October 30, 2012 the Company released its Assay results for core samples from the Company's fiscal 2012 1790m drilling program on its VMS occurrence (ATLAS-1). These press releases are filed on SEDAR (www.SEDAR.com) which show the details of the Assay results.

On February 19, 2013, the Company announced it was retrieving the entire core (~1790m) from the 2012 drilling campaign from the field and transporting it to a secondary location for re-logging and resampling. The purpose of this is two-fold. First, the Company is going to re-examine the core to determine if there is additional evidence of the presence of the second mineralizing event, which may exist outside the boundaries of the VMS zone. Secondly, core from outside the boundaries of the VMS sulfide zones will be sampled to determine the extent of the VMS-associated alteration. This will enable the Company to determine what additional surface sampling might be done to outline VMS potential in other parts of the property. The results of this re-sampling were announced on March 22, 2013. All of these press releases are available on SEDAR.

On November 22, 2013, the Company announced the completion of its (calendar) 2013 drilling program which consisted of 5 holes totaling 1306m, and was focused on the ZAC occurrence. This is located in the northeast portion of the Company's claim block, approximately 22km northeast of the ATLAS-1 base metal discovery, announced in

Anconia Resources Corp. (an exploration stage Company)

Management Discussion & Analysis; for the three and nine months ended June 30, 2018

2012 (see press release dated October 10, 2012). The current program confirmed the existence of a second distinct VMS district within the Company's ATLAS Group of claims.

The 5 drill holes were designed to test the extension of a historically known area of surface zinc mineralization, discovered by Comaplex (the previous holder of the ZAC occurrence claims), the "West Zone" mineralization, as well as to test local geophysical (gravity and electromagnetic) anomalies.

During the last 30 months no work of a significant nature was carried out on the Marce and Zac properties. However, Management will maintain these claims for the future.

In addition to the Atlas properties, the Company has staked additional exploration projects in Nunavut, the RB Property. Initial information with respect to this property is as follows:

RB and Arni Properties

The RB property is located approximately 45 kilometres East-South-East of the ZAC claims, and consists of four staked claims covering approximately 41.8 square kilometers. The Arni property is a relatively small property located in the Baker lake area, approximately 150 km's from the ZAC property. No work has been done on this property in over 3 years. As at September 30, 2016 management decided that these two properties were not viable at this time and none of any future fund raise will be spent on them, hence, and as such the amount expended on these properties have been fully impaired.

Grenfell Property

On September 2, 2014, the Company entered into an option agreement (the "Grenfell Agreement") with Cadillac Ventures Inc. ("Cadillac") whereby the Company will have the option to acquire up to 100% interest in Cadillac's Grenfell Property (the "Property") in the Kirkland Lake area.

Under the terms of the agreement, Anconia can acquire a 60% interest (the "Option") upon: (i) incurring expenditures on the Property of at least \$275,000 by September 1, 2016, and (ii) issuing 2,000,000 common shares of Anconia to Cadillac. As of September 30, 2015, the Company has completed these conditions and now has a 60% interest in the Grenfell property.

Upon acquisition of the 60% interest, Anconia will have the option to acquire the remaining 40% interest in the Property for \$300,000 (\$200,000 of which shall be paid in cash and \$100,000 of which shall be paid by the issuance of common shares of Anconia at a deemed price of the average of the 20 days closing price prior to the day upon which Cadillac is notified the interest is to be earned), in fiscal 2017 the Company renegotiated this part of the original agreement and acquired the additional 40% for the issuance of 5,000,000 common shares of the Company to Cadillac. This has been recorded in the books of the Company as at September 30, 2017.

Cadillac retains a 2% net smelter return royalty ("NSR") in the Property, 1% of the NSR can be purchased by Anconia for a period of up to 2 years after achieving commercial production for the sum of \$1,000,000.

The Grenfell property consists of 16 patented claims and two staked claims for a total land position of approximately 4.3 square kilometers. The two staked claims are 67% owned by Cadillac, the remaining 33% being registered to a company that no longer exists. Cadillac will use its best efforts to obtain the remaining 33%, which upon completion will become part of the earn-in option agreement at no additional cost to Anconia. The Property is located west of the Town of Kirkland Lake, Ontario, and approximately four kilometers west of the currently producing Macassa Mine.

A preliminary review of Ontario Assessment records and a technical report filed on SEDAR under the profile of Richview Resources (which was acquired by Cadillac), has led to the following initial conclusions:

- The Kirkland Lake Main Break (04) has been mapped to approximately 500m from the eastern boundary of the property.
- The Larder Lake Break is within 100 meters of the southern boundary of the property.
- The southern portion of the property is underlain by Timiskaming-Type Clastic Meta-sedimentary rocks, the same rock type which underlies many of the mines and deposits of the Kirkland Main Break.
- Previous work on the southern portion of the property included detailed mapping uncovered the contact between the Timiskaming and Huronian sediments, which is interpreted to be a fault. This is located about

Anconia Resources Corp. (an exploration stage Company)

Management Discussion & Analysis; for the three and nine months ended June 30, 2018

150m south of and parallel to Highway 568. This feature may relate to reactivation the Kirkland Main Break (04) to the east, with a similar strike.

- The property encompasses the historic Four Nations Shaft. The Four Nations area has undergone several exploration campaigns, which included the deepening of the shaft to 536 feet (163 m), with lateral development on several levels between 1926 and 1928, along with surface trenching.
- Since 1934, when the Four Nations Shaft closed, the property has had sporadic exploration with a total of only 34 drill holes totaling 6842m having been completed in 4 campaigns between 1934 and 2004.

The Company has completed a grab sample and a drill programme of 6 holes for a total of 663 meters drilled. The results of which are published on SEDAR.

During the quarter ended March 31, 2018 the Company was able to sell some of the lumber on the property. This resulted in a net generation of cash in the amount of \$33,622. Since the Company is in the exploration stage this cash was applied to reduce the exploration and evaluation asset.

Sault Ste. Marie Property (“SSM 2016”)

On July 15, 2016, the Company entered into an option agreement (the “SSM 2016 Agreement”) with three individuals (the “Owners”) whereby Anconia will have the option to acquire up to a 100% interest in certain claims in the Sault Ste. Marie area (the “SSM 2016 Property”). The Agreement was approved by the TSX Venture Exchange on August 15, 2016. As off the date on this MD&A \$105,000 is outstanding as the final payment on the option agreement. This will be settled when the Company is adequately funded.

Under the terms of the Agreement the Company can acquire a 100% interest (the “Option”) upon: (i) making cash payments of \$210,000 (\$15,000 has been paid as of March 31, 2018), and (ii) issuing 1,200,000 common shares of the Company (the remaining 700,000 common shares were issued in fiscal 2018; 500,000 common shares were issued prior to September 30, 2017) to the Owners over the next three years. The Owners retain a 3% net smelter returns royalty on the SSM 2016 Property, of which Anconia is entitled to purchase 1.5% at any time, for \$1,500,000. In the event that the Company files a technical report on or prior to the issuance of a feasibility study in respect of the SSM 2016 Property, which delineates at least 1,500,000 ounces of gold in the “measured” category, pursuant to National Instrument 43101, the Owners shall be entitled to a bonus payment of \$1,000,000 in cash or common shares of the Company. The form of payment of any bonus, as between cash or shares shall be at the Company’s option.

The Property consists of 22 staked claims consisting of 314 claim units for a total land package of approximately 60 square kilometres. The Property is located approximately 65km north of the city of Sault Ste. Marie, Ontario in the Batchawana Greenstone Belt. The Property is accessible by road on a combination of paved highway and gravel logging roads which run right through the middle of the claim block. A preliminary review of Ontario Assessment records and other public records has indicated that there has been very little exploration carried out on this section of the Batchawana Greenstone Belt, which hosts the past producing Tribag Mine (approximately 40km west of the Sault claims). From the data which is publicly available from the Government of Ontario archives, Anconia notes that there is a base metal showing on the Property with the following characteristics:

- 18 grab samples taken from trenches excavated on surface in 1982 returned an average of 4.9% Zn. Follow up surface grab sampling from the trenches in 1989 returned; 9.68% Zn, 7.50% Zn, 10.23% Zn, 1.43% Zn, and 7.05%Zn.
- Public records indicate that drilling completed by Noranda, below the above noted trenches, in 1990 returned an intersection of 15.7m containing 5.3% Zn, and 0.015% Cu in one drill-hole. The depth of this intersection is not known, however the total length of the drill-hole is known to be 177.93m. Another drill-hole, which was drilled to a total depth of 149.86m had a 12.58m intersection averaging 0.19% Zn and 0.022% Cu.

All the above information is taken from the Province of Ontario Mineral Deposit Inventory, record # “MDI41004SW00027”.

The Company has done some grab sampling and the results have been published on SEDAR.

Anconia Resources Corp. (an exploration stage Company)

Management Discussion & Analysis; for the three and nine months ended June 30, 2018

The exploration activity for the nine months ended June 30, 2018 are as follows:

All amounts in \$	Grenfell property Property	Sault Ste Marie (SSM2016) **	Total
Acquisition Costs **	\$ -	\$ 10,500	\$ 10,500
(Recovery) *	(40,744)	-	(40,744)
	\$ (40,474)	\$ 10,500	\$ (29,974)

* The recovery is as a result of the net proceeds of a sale of some lumber on the property.

** The Company issued 700,000 common shares of the Company as part of the acquisition costs of the SSM2016 property. The shares were valued at \$0.15 per share based on the fair market value of the Company's shares on the date of issuance. These shares were issued in accordance with the terms of the option agreement.

The exploration activities for the nine months ended June 30, 2017 are as follows:

All amounts in \$	Grenfell property	SSM 2016 Property (Note 1)	Nunavut Atlas	Total
Geology	\$ -	\$ 15,245		\$ 15,245
Other	-	-	\$ 500	500
Acquisition	150,000	10,500		19,500
	\$ 150,000	\$ 25,745	\$ 500	\$ 176,245

Note 1: The Company issued 300,000 common shares of the Company for its partial acquisition of the SSM 2016 Property, in accordance with the terms of the option agreement. The fair market value of the Company's common shares on the date of the issuance was \$0.035 per common share.

The exploration activities from inception to June 30, 2018 are as follows:

All amounts in \$	impaired or written off	Grenfell Property	SSM 2016 Property	Nunavut Atlas Properties	Total

	-	699,754	115,791	5,047,958	5,863,503

Financial Statements Going Concern Assumption

The financial statements have been prepared on the basis of accounting principles applicable to a going concern under IFRS. The use of these principles under IFRS assumes that the Company will continue in operation for the foreseeable future and will be able to realize assets and discharge its liabilities in the normal course of operations.

The business of exploration involves a high degree of risk, as such there is no assurance that the Company's expected exploration programs will result in profitable mining operations. Until it is determined that the E&E assets can be economically mined, they are classified as exploration and evaluation assets using the full cost method allowed under IFRS 6. The Company's continued existence is dependent upon the discovery of economically recoverable reserves and resources, securing and maintaining title and beneficial interest in its E&E, and making the required payments pursuant to E&E purchase agreements. The Company has yet to generate income and cash flows from its operations.

There is no assurance that the Company will be able to obtain the external financing necessary to explore, develop if E&E are proven successful and bring to commercial production its E&E. The Company has no proven history of profitability, which casts doubt as to whether the Company will be able to continue as a going concern should it not be able to obtain the necessary financing to fund working capital and capital expenditures. The ability of the Company to arrange such financing in the future depends in part upon the prevailing capital market conditions as well as the business performance of the Company. If additional financing is raised by the issuance of shares from the treasury of the Company existing shareholders may have their interest diluted. If adequate financing is not available, the Company may be required to relinquish rights to certain of its interests or terminate its operations.

As at June 30, 2018, the Company had yet to generate revenues from operations and had an accumulated deficit of \$5,138,511 (September 30, 2017 - \$4,872,140). As at June 30, 2018, the Company had Cash and cash equivalents of \$10,274 (September 30, 2017 - \$8,265) and a working capital deficit of \$1,064,794 (September 30, 2017 - \$838,897)

The Company is actively seeking additional sources of financing. In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future, which is at least, but not limited to, twelve months from the end of the reporting period. Management is aware, in making its assessment, of uncertainties related to events or conditions that may cast significant doubt upon the entity's ability to continue as a going concern that these uncertainties are material and, therefore, that it may be unable to realize its assets and discharge its liabilities in the normal course of business. Accordingly, they do not give effect to adjustments that would be necessary should the Company be unable to continue as a going concern and therefore to realize its assets and discharge its liabilities and commitments in other than the normal course of business and at amounts different from those in the accompanying financial statements. These adjustments could be material.

Anconia Resources Corp. (an exploration stage Company)

Management Discussion & Analysis; for the three and nine months ended June 30, 2018

Results of operations

A summary of selected financial information of the Company for recently completed periods is provided below:

Selected quarterly information

The following table sets forth selected financial information of the Company for the quarters ended as noted below:

For the quarter ended	June 30, 2018	Mar 31, 2018	Dec 31, 2017	Sept 30, 2017
Revenue	\$ Nil	\$ Nil	\$ Nil	\$ Nil
Income from operations	\$ Nil	\$ Nil	\$ Nil	\$ Nil
Net gain (loss) for the period	\$ ()	\$ (92,640)	\$ (89,464)	\$ (106,491)
Basic & diluted (loss) per share	\$ (0.00)	\$ (0.00)	\$ (0.00)	\$ (0.00)
Cash and cash equivalents	\$ 10,274	\$ 8,587	\$ 8,775	\$ 8,265
Exploration and evaluation assets	\$ 5,863,503	\$ 5,859,855	\$ 5,893,477	\$ 5,893,477
Total Assets	\$ 5,879,235	\$ 5,870,131	\$ 5,906,490	\$ 5,906,212
Shareholder's equity	\$ 4,798,709	\$ 4,872,476	\$ 4,965,116	\$ 5,054,580
For the quarter ended	June 30, 2017	Mar 31, 2017	Dec 31, 2016	Sept 30, 2016
Revenue	\$ Nil	\$ Nil	\$ Nil	\$ Nil
Income from operations	\$ Nil	\$ Nil	\$ Nil	\$ Nil
Net gain (loss) for the period	\$ (92,034)	\$ (106,996)	\$ (88,125)	\$ (285,445)
Basic & diluted (loss) per share	\$ (0.00)	\$ (0.00)	\$ (0.00)	\$ (0.01)
Cash and cash equivalents	\$ 12,916	\$ 17,475	\$ 69,235	\$ 101,083
Exploration and evaluation assets	\$ 5,893,477	\$ 5,743,477	\$ 5,742,977	\$ 5,717,232

Shareholder's equity	\$ 5,161,071	\$ 5,103,105	\$ 5,210,101	\$ 5,251,945

The major changes in the quarterly numbers can be explained as follows:

For the quarter ended June 30, 2018: Cash and cash equivalents increased by \$1,687 from the previous quarter. This increase was as a result of a net (decrease) in Cash provided by operating activities of (\$5,165) and net cash provided in investing activities of \$6,852 primarily in exploration and evaluation assets as a result of a sale of some lumber from the Grenfell property. Total assets increased by \$9,104 as a result of a increase in current assets of \$5,456, and an increase in exploration and evaluation assets of \$3,648. The decrease in Shareholders' equity of (\$73,767) is as a result of a net loss for the period of \$84,267 offset offset by shares issued as per the option agreement re the SSM2016 property valued at \$10,500.

For the quarter ended March 31, 2018: Cash and cash equivalents decreased by \$188 from the previous quarter. This (decrease) was as a result of a net (decrease) in Cash provided by operating activities of \$33,810 and net cash provided in investing activities of 33,622 primarily in exploration and evaluation assets as a result of a sale of some lumber from the Grenfell property. Total assets decreased by \$36,359 as a result of a decrease in current assets of \$2,737, and an decrease in exploration and evaluation assets of \$33,622. The decrease in Shareholders' equity of (\$92,640) is as a result of a net loss for the period.

For the Quarter ended December 31, 2017: cash and cash equivalents increased by \$510 from the previous quarter. This increase was mainly due to a increase from operating activities of \$510. Total assets increased by \$276. All of this decrease was due to a small increase in current assets from the previous period. The shareholders equity decreased from the previous period by \$89,464 which is as a result of the net loss for the quarter ended December 31, 2017.

For the Quarter ended September 30, 2017: cash and cash equivalents decreased by \$4,651 from the previous quarter. This decrease was mainly due to a decrease from operating activities of (4,651). Total assets decreased by \$14,724. All of this decrease was due to a decrease in current assets from the previous period. The shareholders

Anconia Resources Corp. (an exploration stage Company)

Management Discussion & Analysis; for the three and nine months ended June 30, 2018

equity decreased from the previous period by \$106,491 which is as a result of the net loss for the quarter ended September 30, 2017.

For the quarter ended June 30, 2017: cash and cash equivalents decreased by \$4,559 from the previous quarter. This decrease was as a result of a decrease in Cash from operating activities of (\$4,559). Total assets increased by \$140,140 as a result of a decrease in current assets of \$9,860 and an increase in Exploration and evaluation assets of \$150,000. The increase in Shareholders' equity of \$57,966 is as a result of a net financing of \$150,000 for acquiring the remaining interest in the Grenfell property, offset by a net loss for the period of \$92,034.

For the quarter ended March 31, 2017: Cash and cash equivalents decreased by \$51,760 from the previous quarter. This decrease was as a result of cash used in operating activities of (\$51,280), net cash used in investing activities of \$500 primarily in exploration and evaluation assets. Total assets decreased by \$55,224 as a result of a decrease in cash and cash equivalents of \$51,760, an increase in exploration and evaluation assets of \$500 and a net decrease in amounts receivable and other assets of \$3,964. The decrease in Shareholders' equity of \$106,996 is as a result of a net loss for the period of \$106,996.

For the quarter ended December 31, 2016: Cash and cash equivalents decreased by (\$31,848) from the previous quarter. This decrease was as a result of a decrease in cash from operating activities of (\$52,384), net cash used in investing activities of (\$15,245) primarily in exploration and evaluation assets offset by cash provided by financing activities of \$35,781. Total assets decreased by (\$15,276) as a result of a decrease in cash and cash equivalents of (\$31,848), an increase in exploration and evaluation assets of \$25,745 and a net decrease in amounts receivable of (\$9,173). The decrease in Shareholders' equity of (\$41,844) is as a result of the net loss for the period of (\$88,125) offset by a net increase in share capital and reserves for warrants of \$46,281.

For the quarter ended September 30, 2016: cash and cash equivalents increased by \$93,716 from the previous quarter. This increase was as a result of a net increase in cash used in operating activities of \$120,082, a net cash used in investing activities of \$145,798 (primarily is exploration and evaluation assets) offset by cash provided by financing activities of \$359,596. Total assets increased by \$80,629. This increase was due to an increase in current assets of \$123,263 offset by a decrease in exploration and evaluation assets of \$42,634. The major reason for the decrease in exploration and evaluation assets is a result of a net expenditure of \$121,546 offset mainly by an impairment recorded in the period of \$164,180. Shareholders' Equity increased by \$466,049. This increase was mainly as a result of a net financing of \$751,494 offset by a net loss for the period of \$285,445.

Anconia Resources Corp. (an exploration stage Company)

Management Discussion & Analysis; for the three and nine months ended June 30, 2018

Results of Operations

Consolidated Operating Results

This section should be read in conjunction with the unaudited Condensed Interim Consolidated Statements of Loss and Comprehensive Loss for the three and nine months ended June 30, 2018 and the audited Consolidated Statements of Comprehensive Loss for the year ended September 30, 2017, and 2016, and the notes associated therewith.

Nine months ended June 30, 2018

The operating result for the nine months ended June 30, 2018, is compared to those for the nine months ended June 30, 2017 as follows:

General and administrative costs

Nine months ended June 30,	2018	2017
Salaries and benefits	\$ 30,000	\$ 32,376
Professional fees	44,206	53,468
Consulting fees	115,200	127,049
Shareholder and investor relations	910	4,751
Reporting issuer costs	23,740	21,133
Administrative expense	50,855	48,238
	\$ 264,911	\$ 287,015

Other significant Items

Nine months ended June 30	2018	2017
Foreign exchange loss (gain)	\$ 1,460	\$ 169
Interest Income	-	(29)-
Net loss and comprehensive loss for the period	\$ 266,371	\$ 287,155

For the nine months ended June 30, 2018 the Company incurred a net loss and comprehensive loss of \$266,371 compared with a loss of \$287,155 for the nine months ended June 30, 2017.

The major items which resulted in these losses for the nine months ended June 30, 2018 were;

- Net loss (gain) from foreign exchange: 2018 \$1,460 (2017 – \$169);
- General and administrative expenses of \$264,911 for 2018 (2017 – \$287,015).

The major items are as follows:

- Professional fees of \$44,206 for 2018 (2017 – \$53,468), these fees are comprised of mainly legal, audit, accounting and corporate secretarial services), this decrease was mainly due to a slightly lower level of legal and corporate fees in the Company for the nine months ended June 30, 2018 when compared to that of 2017;
- Consulting fees of \$115,200 for 2018 (2017 – \$127,049). These costs are the fees earned by the president and CEO, occasionally by a director who provides business advisory services and the CFO (see the related party section below).;
- Shareholders and investor relations for 2018 were \$910 (2017 - \$4,751). This decrease was as a result of the curtailment of most of Investor relations;
- Reporting and issuer costs for 2018 were \$24,650 (2017 – \$25,844);

Anconia Resources Corp. (an exploration stage Company)

Management Discussion & Analysis; for the three and nine months ended June 30, 2018

- o Administrative expenses for 2018 were \$50,855 (2017 – \$48,238) and
- o Salaries and benefits (director fees and related taxes) \$30,000 for 2017 (2017 - \$32,376);

Consolidated Operating Results

Three months ended March 31, 2018

The operating result for the three months ended June 30, 2018, is compared to those for the three months ended June 30, 2017 as follows:

General and administrative costs

Three months ended March 31,	2018	2017
Salaries and benefits	\$ 10,000	\$ 10,000
Professional fees	17,060	15,741
Consulting fees	38,400	50,249
Shareholder and investor relations	470	278
Reporting issuer costs	1,953	666
Administrative expense	17,635	13,609
	\$ 85,518	\$ 90,543

Other significant Items

Quarter ended March 31	2017	2017
Foreign exchange loss (gain)	\$ (1,251)	\$ 1,520
Interest income	-	(29)
Net loss and comprehensive loss for the period	\$ 84,267	\$ 92,034

For the three months ended June 30, 2018 the Company incurred a net loss and comprehensive loss of \$84,267 compared with a loss of \$92,034 for the three months ended June 30, 2017.

The major items which resulted in these losses for the quarter ended March 31, 2018 were;

- Net (gain) from foreign exchange: 2018 \$(1,251) (2017 – 1,520).
- General and administrative expenses of \$90,659 for 2017 (2017 – \$106,996).

The major items are as follows:

- o Professional fees of \$17,060 for 2018 (2017– \$15,741); these fees are comprised of mainly legal, audit, accounting and corporate secretarial services; this increase was mainly due to a reduction in legal and corporate secretarial services in the Company for the quarter ended June 30, 2018 when compared to that of 2017;
- o Consulting fees of \$38,400 for 2018 (2017 – (\$50,249)). These are the fees charged by the President & CEO, a director who provides business advisory services occasionally and the CFO, refer to the related party section below;

- o Shareholder and Investor relations and reporting and issuer costs for 2018 were \$2,423 (2017 – \$944). and
- o Administrative expenses for 2018 were \$17,635 (2017 – \$13,609);

Anconia Resources Corp. (an exploration stage Company)

Management Discussion & Analysis; for the three and nine months ended June 30, 2018

Consolidated Financial position

This section should be read in conjunction with the unaudited Condensed Consolidated Interim Statements of Financial Position for the three and nine months ended June 30, 2018 and the audited Consolidated Statements of Financial Position and the audited Consolidated Statement of Changes in Shareholders' Equity as at September 30, 2017 and the audited Consolidated Statements of Cash Flows for the year ended September 30, 2017.

The Company's cash and cash equivalents as at June 30, 2018 were \$10,274 (September 30, 2017 – \$8,265).

Consolidated current assets of the Company as at June 30, 2018 were \$15,732 (September 30, 2017 - \$12,735), comprising of cash and cash equivalents, HST tax receivables and prepaid expenses. Total consolidated assets as at June 30, 2018 were \$5,879,235 (September 30, 2017 - \$5,906,212), which are comprised of current assets of \$15,732 (September 30, 2017 – \$12,735), and exploration and evaluation assets of \$5,863,503. (September 30, 2017 - \$5,893,477).

Consolidated Liabilities

Consolidated current liabilities as at June 30, 2018, were \$1,080,526 (September 30, 2017 - \$851,632) which are comprised largely of accounts payable and accrued liabilities of \$1,047,091 (September 30, 2017 - \$821,002), Loan from a related Party of \$33,435 (September 30, 2017 – \$30,630).

Consolidated Cash Flows

The net cash used in operating activities during the nine months ended June 30, 2018, was \$38,465 (2017 - \$108,203). This amount was as a result of net loss for the nine months ended June 30, 2018 of \$266,371 (2017 - \$287,155) And this was off-set by a net (increase) in receivables and payables of \$(225,101) (2017 - \$(176,147)) and interest expense of \$2,805 (2017 - \$2,805). There was no revenue during the period.

Cash used (recovered) in investing activities during the nine months ended June 30, 2018, was \$(40,474) (2017 - \$15,745) which is attributable to (recovery) expenditures on exploration and evaluation assets. In the nine months ended June 30, 2018 the Company completed no equity financing (2017 – \$35,781). The cash recovered in investing activities in the nine months ended June 30, 2018 was as a result of the sale of some lumber on the property.

Liquidity

The Company's activities have been funded to date through equity financing and the Company expects that it will continue to be able to utilize this source of financing until it develops cash flows from operations. There can be no assurance, however, that the Company will be successful in its efforts. If such funds are not available or other sources of finance cannot be obtained, then the Company will be forced to curtail such proposed activities to a level for which funding is available and can be obtained.

During the year ended September 30, 2017, the Company completed an equity financing for gross proceeds of \$40,449, the issuance costs was \$4,668, there was no fund raise in the nine months ended June 30, 2018. As at June 30, 2018 the Company's current assets are comprised of Cash and cash equivalents of \$10,274 and other receivables of \$5,458 (mainly comprising of HST receivable). As at June 30, 2018, the Company had a working capital deficiency of \$1,064,794 and shareholders' equity of \$4,798,709.

Total shares outstanding as at September 30, 2017	105,156,689
Shares issued to for exploration and evaluation assets on April 2018	700,000
Total shares outstanding as at June 30, 2018	105,856,689
Total warrants outstanding as at September, 30, 2016	25,950,000
Warrants associated with the December 23, 2016, placement and expire in December 23, , 2019	808,980
Total warrants outstanding as at September 30, 2017	26,758,980
The warrants expiring in March , 2018, expired unexercised	(18,400,000)
Total warrants outstanding as at June 30, 2018	8,358,980
Total options outstanding as at September 30, 2016	3,150,000
Options expired unexercised	(850,000)
Total Options outstanding as at September 30, 2017 and June 30, 2018	2,300,000
Total Number of Diluted Securities as at June 30, 2018	116,515,669
Total Number of Diluted Securities as at August xx, 2018	116,515,669

As at the date of this MD&A August 9th, 2018, 105,856,689 common shares are issued and outstanding; 2,300,000 stock options are outstanding and 8,358,980 warrants are outstanding. The increase / (decrease) in shares, warrants and options outstanding, are identified in the table above.

Financial and Other Instruments

The Company's financial instruments and liabilities consist of cash and cash equivalents, amounts receivable, and accounts payable and accrued liabilities. Unless otherwise noted, it is management's opinion that the Company is not exposed to significant interest, currency or credit risks arising from these financial instruments. The fair value of these instruments approximates their carrying value due to the short-term nature of their maturity.

Significant accounting judgments and estimates

The preparation of the Company's consolidated financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the consolidated financial statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates. The consolidated financial statements of the Company include estimates that, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the consolidated financial statements and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods. These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Estimates and judgments are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Critical accounting estimates

Significant assumptions about the estimates that management has made that could result in a material adjustment to the carrying amounts of assets and liabilities, in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

- the recoverability of amounts receivable that are included in the statements of financial position;
- valuation and recoverability of exploration and evaluation assets. Management considers the economics of the project, including the latest resources prices and the long-term forecasts, and the overall economic viability of the project;
- management assessment of no material restoration, rehabilitation and environmental provisions, based on the facts and circumstances that existed during the period.;
- the valuation of share-based payments. Black-Scholes valuation model is used for the valuation of the share-based payments granted and the assumptions used for the valuation include volatility of the share price, risk-free interest rate and the life of the stock options granted. These assumptions are highly subjective and materially affect the calculated fair value; and
- the determination of deferred income tax assets and liabilities is inherently complex and requires making certain estimates and assumptions about future events. While income tax filings are subject to audits and reassessments, the Company has adequately provided for all income tax obligations. However, changes in facts and circumstances as a result of income tax audits, reassessments, jurisprudence and any new legislation may result in an increase or decrease in our provision for income taxes.

Critical accounting judgments

The application of the Company's accounting policy for exploration and evaluation expenditure requires judgment in determining whether there are indicators of impairment. When such indicators exist, an impairment loss is recognized for the amount by which the exploration and evaluation assets carrying amount exceeds their recoverable amount. The recoverable amount is the higher of the exploration and evaluation assets' fair value less costs to dispose and their value in use.

Anconia Resources Corp. (an exploration stage Company)

Management Discussion & Analysis; for the three and nine months ended June 30, 2018

The amount of deferred tax assets to recognize and the extent of impairment allowance for the deferred tax asset also requires management to make judgments.

The assessment of the Company's ability to continue as a going concern involves judgment regarding future funding available for its operations and working capital requirements as discussed in note 1 of the audited consolidated financial statements for the year ended September 30, 2017.

The key sources of estimation uncertainty that have a significant risk of causing material adjustment to the amounts recognized in the consolidated financial statements are:

Share-based payment transactions

The fair value of share options granted is recognized as an expense with a corresponding increase in equity. An individual is classified as an employee when the individual is an employee for legal or tax purposes (direct employee) or provides services similar to those performed by a direct employee, including directors of the Company.

The fair value of share-based payments to employees is measured at the grant date and recognized over the period during which the options vest. Share-based payments to non-employees are measured at the fair value of the goods or services received or the fair value of the equity instruments issued if it is determined the fair value of the goods or services cannot be reliably measured, and are recorded at the date the goods or services are received. The fair value of the options granted is measured using the Black-Scholes option-pricing model, taking into account the terms and conditions upon which the options were granted. At each financial position reporting date, the amount recognized as an expense is adjusted with consideration of forfeiture rate to reflect the actual number of share options that are expected to vest. The Company has no share-based payments capitalized in exploration and evaluation assets. For those options that expire after vesting, the recorded value is retained in the reserve.

Fair value of financial instruments

The estimated fair value of financial assets and liabilities, by their very nature, are subject to measurement uncertainty.

Taxes

Provisions for taxes are made using the best estimate of the amount expected to be paid based on a qualitative assessment of all relevant factors. The Company reviews the adequacy of these provisions at the end of the reporting period. However, it is possible that at some future date an additional liability could result from audits by taxing authorities. Where the final outcome of these tax-related matters is different from the amounts that were initially recorded, such differences will affect the tax provisions in the period in which such determination is made.

Exploration and evaluation expenditures

Exploration and evaluation asset acquisition costs and related direct exploration costs may be deferred until the assets are placed into production, sold, abandoned, or written down, where appropriate. The Company's accounting policy is to capitalize exploration costs. The policy is consistent with other junior exploration companies which have not established mineral reserves objectively. An alternative policy would be to expense these costs until sufficient work has been done to determine that there is a probability a mineral reserve can be established; or alternatively, to expense such costs until a mineral reserve has been objectively established. Management is of the view that its current policy is appropriate for the Company at this time. Based on annual impairment reviews made by management, or earlier if circumstances warrant, in the event that the long-term expectation is that the net carrying amount of these capitalized exploration costs will not be recovered, then the carrying amount is written down accordingly and the write-down charged to operations. A write-down may be warranted in situations where an exploration and evaluation asset is to be sold or abandoned; or exploration activity ceases on an exploration and evaluation asset due to unsatisfactory results or insufficient available funding.

As the Company is in the exploration stage with respect to its investment in mineral properties. The Company capitalizes costs directly related to the acquisition, exploration and evaluation of mineral properties. Such costs include, but are not restricted to, geological, geophysical, drilling, trenching and sampling costs including the support costs and supplies required in relation thereto. These assets are recorded at cost as adjusted for impairments in

Anconia Resources Corp. (an exploration stage Company)

Management Discussion & Analysis; for the three and nine months ended June 30, 2018

value. Impairment is assessed when facts and circumstances suggest that the carrying amount of the asset may exceed its recoverable amount. In assessing impairment, exploration and evaluation assets are grouped into Cash Generating Units, ("CGU's"), on the basis of areas of interest. Management groups mineral claims that are contiguous and specific to an area that encompasses the same prospective minerals, into one area of interest and assigns a name to this mineral property. Each named mineral property is considered an area of interest and a CGU.

Although not an exhaustive list, one or more of the following facts and circumstances indicate that a specific CGU should be tested for impairment:

- The period for which the entity has the right to explore in the specific area has expired during the financial statement period or will expire in the near future and is not expected to be renewed.
- Substantive expenditures on further exploration for, and evaluation of, mineral resources in the specific area is neither budgeted nor planned.
- Exploration for and evaluation of mineral resources in the specific area has not led to the discovery of commercially viable quantities of mineral resources and the entity has decided to discontinue such activities in the specific area.
- Sufficient data exists to indicate that, although a development in the specific area is likely to proceed, the carrying amount of the exploration and evaluation asset is unlikely to be recovered in full from successful development or sale.

An impairment loss may be reversed in a situation where there is a change in the circumstances that had initially dictated that impairment had occurred. An example of such a situation might include, but not be limited to, the recommencement of exploration activity on a mineral property due to a significant change in commodity prices.

Where the Company's exploration commitments for a CGU are performed under option agreements with a third party, the proceeds of any option payments under such agreements are applied to the CGU to the extent of costs incurred. The excess, if any, is credited to operations. Option payments made by the Company are recorded as exploration and evaluation assets. Options are exercisable entirely at the discretion of the optionee and accordingly, are recorded as exploration and evaluation assets or recoveries when the payments are made or received. The proceeds on the sale of exploration and evaluation assets are applied to the area of interest to the extent of costs incurred and the excess, if any, is credited to operations. In some circumstances option payments received by or made by the Company are made in whole or in part through the issuance of common shares. The value of these payments in shares is calculated using the fair value of the shares on the date of issue.

Impairment of nonfinancial assets

At the end of each reporting period, the Company reviews the carrying amounts of its nonfinancial assets with finite lives to determine whether there is any indication that those assets are impaired. Where such an indication exists, the recoverable amount of the asset is estimated. For the purpose of measuring recoverable amounts, assets are grouped at the lowest levels of CGU. The recoverable amount is the higher of an asset's fair value less costs to dispose and value in use (being the present value of the expected future cash flows of the relevant CGU). An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The company evaluates impairment losses for potential reversals when events or circumstances warrant such consideration.

Accounting Policies

The Company applies International Financial Reporting Standards as issued by the International Accounting Standards Board. The significant accounting policies and method of computation followed in Anconia's consolidated financial statements are set out in detail in Note 2 of the September 30, 2017 audited consolidated financial statements.

Management Discussion & Analysis; for the three and nine months ended June 30, 2018

Changes in accounting policies

There were no changes in accounting policies for the nine months ended June 30, 2018.

New accounting standards and interpretations

Certain new pronouncements were issued by the IASB or IFRIC that were not effective as of September 30, 2017. The standards impacted that are applicable to the Company are as follows:

- IFRS 9 - Financial instruments ("IFRS 9") was issued by the IASB in November 2009 and will replace IAS 39 Financial Instruments: Recognition and Measurement ("IAS 39"). IFRS 9 replaces the multiple rules in IAS 39 with a single approach to determine whether a financial asset is measured at amortized cost or fair value and a new mixed measurement model for debt instruments having only two categories: amortized cost and fair value. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. This standard requires a single impairment method to be used, replacing the multiple impairment method in IAS 39.

In October 2010, the IASB added requirements for financial liabilities to IFRS 9. These requirements were largely carried forward from the existing requirements in IAS 39, however, fair value changes due to credit risk for liabilities designated at fair value through profit and loss are generally recorded in other comprehensive income.

In November 2013, the IASB amended IFRS 9 to include a new general hedge accounting model. In July 2014, the IASB issued the final version IFRS 9 that supersedes the requirements of earlier versions of the standard. The new standard will replace both IAS 39 and IFRIC 9 - Reassessment of Embedded Derivatives. The new standard will retain the classification and measurements requirements and new hedge accounting model introduced by the previous versions while introducing a single forward-looking expected credit loss impairment model. The final version of this new standard is effective for annual periods beginning on or after January 1, 2018. The Company is still in the process of assessing the impact of this pronouncement.

- IFRS 16 - Leases ("IFRS 16") was issued on January 13, 2016 to require lessees to recognize assets and liabilities for most leases. For lessors, there is little change to the existing accounting in IAS 17 Leases. The IASB issued its standard as part of a joint project with the Financial Accounting Standards Board ("FASB"). The FASB has not yet issued its new standard, but it is also expected to require lessees to recognize most leases on their statement of financial position.

The new standard will be effective for annual periods beginning on or after January 1, 2019. Early application is permitted, provided the new revenue standard, IFRS 15 Revenue from Contracts with Customers, has been applied or is applied at the same date as IFRS 16. The Company is still in the process of assessing the impact of this pronouncement on the consolidated financial statements.

Off-Balance Sheet Arrangements

There are no off-balance sheet arrangements at the date of this MD&A.

Commitment

There are no commitments at the date of this MD&A.

Management's Responsibility for Financial Statements

The information provided in this MD&A, including the consolidated financial statements, is the responsibility of management. In the preparation of these consolidated financial statements, estimates are sometimes necessary to make a determination of future values for certain assets or liabilities. Management believes such estimates have been based on careful judgments and have been properly reflected in the accompanying consolidated financial statements.

Anconia Resources Corp. (an exploration stage Company)

Management Discussion & Analysis; for the three and nine months ended June 30, 2018

Management maintains a system of internal controls to provide reasonable assurance that the Company's assets are safeguarded and to facilitate the preparation of relevant and timely information.

Risk Factors

Anconia is subject to a number of risks due to the nature of the business of mineral exploration and the early stage of its development. The following risk factors are provided from the perspective of the Company.

Mineral Exploration Risks

The successful exploration of exploration and evaluation assets is speculative. Such activities are subject to a number of uncertainties, which even a combination of careful evaluation, experience and knowledge may not eliminate. Most exploration projects do not result in the discovery of commercially mineable deposits. There is no certainty that the expenditures made or to be made by the Company in the exploration of the exploration and evaluation assets in which it may have an interest will result in the discovery of base metals or other mineralized materials in commercial quantities. While discovery of a base metal deposit may result in substantial rewards, few exploration and evaluation assets that are explored are ultimately developed into producing mines. Significant expenditures may be required to establish reserves by drilling and to construct mining and processing facilities at a site. No assurance can be given that minerals will be discovered in sufficient quantities to justify commercial operations. Whether a mineral deposit will be commercially viable depends on a number of factors, including the particular attributes of the deposit (i.e. size, grade, access and proximity to infrastructure), financing costs, the cyclical nature of commodity prices and government regulations (including those relating to prices, taxes, currency controls, royalties, land tenure, land use, importing and exporting of mineral products, and environmental protection). Although substantial benefits may be derived from the discovery of a major deposit, it is impossible to ensure that the current exploration programmes of the Company will result in profitable commercial mining operations or that funds required for development can be obtained on a timely basis. The implementation of certain aspects of the Company's strategy in respect of the exploration and evaluation asset is subject to the completion of detailed feasibility studies. The Company is not able to predict the outcome of such studies and unfavourable results may have a material adverse effect on the Company's business, financial condition, results of operations and prospects.

Country Risk

The Company could be at risk regarding any political developments in the country which it operates. At present, the Company is active only in Canada and possibly other areas outside Canada. The Company's mineral exploration may be adversely affected by political instability, legal and economic uncertainty in the countries where the Corporation operates or has plans to operate. These risks may include: political unrest; labour disputes; invalidation of governmental orders and permits; corruption; war and civil disturbances; terrorist activities; arbitrary changes in laws; regulations; policies; taxation; price controls; exchange controls; delays in or the inability to obtain necessary permits; opposition to mining from environmental activists or other non-governmental organizations; limitations on foreign ownership; limitations on the repatriation of earnings; limitation on mineral exports and increase financing costs. These risks may limit or disrupt the Company's projects, restrict the movement of funds or result in the deprivation of contractual rights.

Failure to raise capital when needed would have a material adverse effect on the Company's business, financial condition, results of operations and prospects.

Regulatory Requirements

Mining operations, development and exploration activities are subject to extensive laws and regulations governing prospecting, development, production, exports, taxes, labour standards, occupational health, waste disposal, environmental protection and remediation, protection of endangered and protected species, mine safety, toxic substances and other matters. Changes in these regulations or in their application are beyond the control of the Company and could adversely affect its operations, business and results of operations.

Government approvals and permits are currently, and may in the future be, required in connection with the exploration and evaluation assets. To the extent such approvals are required and not obtained, the Company may be restricted or prohibited from proceeding with planned exploration or development activities. Failure to comply with applicable laws, regulations and permitting requirements may result in enforcement actions thereunder,

Anconia Resources Corp. (an exploration stage Company)

Management Discussion & Analysis; for the three and nine months ended June 30, 2018

including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment, or remedial actions. Parties engaged in mining operations may be required to compensate those suffering loss or damage by reason of the mining activities and may be liable for civil or criminal fines or penalties imposed for violations of applicable laws or regulations. Amendments to current laws, regulations and permitting requirements, or more stringent application of existing laws, could have a material adverse impact on the Company and cause increases in capital expenditures or production costs or require abandonment or delays in development of properties or reductions in levels of production at producing properties.

Reliability of Historical Information

The Company has relied upon historical data compiled by previous parties involved with the properties. To the extent that any of such historical data may be inaccurate or incomplete, the Company's exploration plans may be adversely affected.

Title Matters

The acquisition of title to exploration and evaluation assets is a very detailed and time-consuming process. Title to, and the area of, mineral concessions may be disputed. Although the Company believes it has taken reasonable measures to ensure proper title to its properties, there is no guarantee that title to the property will not be challenged or impaired. Third parties may have valid claims underlying portions of the Company's interests. Further, there can be no assurance that any pending applications for mineral rights in which the Company holds an interest (including in respect of the properties) will be granted in whole or in part. If a title defect exists, it is possible that the Company may lose all or part of its interest in the properties or any other property subsequently acquired to which such title defect exists.

Licenses and Permits

The current and proposed exploration activities of the Company require certain permits and licenses from various governmental authorities and such operations are and will be governed by laws and regulations governing exploration, development and production, labour standards, occupational health, waste disposal, toxic substances, land use, environmental protection, safety, mine permitting and other matters. Companies engaged in exploration activities generally experience increased costs and delays as a result of the need to comply with applicable laws, regulations and permits. There can be no assurance that all licenses and permits which the Company may require to carry out exploration of its projects will be obtainable on reasonable terms or on a timely basis, or that such laws and regulations would not have an adverse effect on any project that the Company may undertake.

Failure to comply with applicable laws, regulations, and permitting requirements may result in enforcement actions thereunder, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment, or remedial actions. Parties engaged in exploration operations may be required to compensate those suffering loss or damage by reason of the exploration activities and may have civil or criminal fines or penalties imposed for violations of applicable laws or regulations and, in particular, environmental laws.

Commodity Price Fluctuations

The price of the Company's securities, its financial results and exploration activities may be significantly adversely affected by declines in the price of base metals demand and price are determined by numerous factors beyond the control of the Company including the demand for electricity, international exchange rates, political and economic conditions and production costs in mining regions, production and consumption patterns, speculative activities, increased production due to improved mining and production methods, government regulations relating to prices, taxes, royalties, land tenure, land use, environmental protection and the degree to which a dominant producer uses its market strength to bring supply into equilibrium with demand. The combined effects of any or all of these factors on metal prices or volumes are impossible for the Company to predict. If realized metal prices fall below the full cost of production of any of the Company's operations and remain at such level for any sustained period, the Company will experience losses, which may be significant, and may decide to discontinue affected operations, forcing the Company to incur closure or care and maintenance costs, as the case may be. In addition declining metal prices can impact operations by requiring a reassessment of the feasibility of a particular project. Such a reassessment may

Management Discussion & Analysis; for the three and nine months ended June 30, 2018

be the result of a management decision or may be required under financing arrangements related to a particular project. Even if the project is ultimately determined to be economically viable, the need to conduct such a reassessment may cause substantial delays or may interrupt operations until the reassessment can be completed.

Current Global Financial Conditions

Recent events in global financial markets have had a profound impact on worldwide economies. Many industries have been impacted by the changes in market conditions to varying degrees. Some of the key impacts of the current financial market turmoil include contraction in credit markets and resulting widening of credit risk as well as enhanced volatility in commodity, equity and foreign exchange markets. A continued or worsened slowdown in financial markets or other economic conditions, including without limitation, constraints in credit or surety markets, a sustained slump in economic activity in the mining industry in general and in Canada in particular, the availability of private and public sector funding for mineral exploration projects, pressure on margins arising from an altered competitive landscape or an increased risk of corporate bankruptcy in the markets in which the Company operates, may adversely affect the Company in ways which are not possible to predict given the unprecedented nature of the current crisis.

Currency Fluctuations

Currency fluctuations may affect some of the Company's future operations, financial positions and results. The Company's financial results are reported in Canadian dollars and the majority of its funds are held in Canadian dollars at a major Canadian Bank. The majority of the Company's costs to date are in Canadian dollars. However, if the Company expands its activities outside Canada the Company will have increased exposure to fluctuations in the Canadian dollar against foreign currencies.

Uninsured Risks

In the course of exploration, development and production of mineral properties, certain risks, and in particular, unexpected or unusual geological operating conditions including rock bursts, cave-ins, fire, flooding and earthquakes may occur. It is not always possible to fully insure against such risks as a result of high premiums or other reasons. Should such liabilities arise, they could reduce or eliminate any future profitability and result in increasing costs, have a material adverse effect on the Company's results and a decline in the value of the securities of the Company.

Environmental Regulations

The activities of the Company are subject to laws and regulations controlling not only mineral exploration and exploitation activities themselves but also possible effects of such activities upon the environment. Environmental legislation generally provides for restrictions and prohibitions on spills, releases or emissions of various substances produced in association with certain mining industry operations which would result in environmental pollution. A breach of such legislation may result in the imposition of fines and penalties. In addition, certain types of operations require the submission of environmental impact assessments and approval thereof by government authorities.

Environmental legislation is evolving in a manner which means stricter standards, and enforcement, increased fines and penalties for non-compliance, and more stringent environmental assessments of proposed projects. Environmental assessments of proposed projects carry a heightened degree of responsibility for companies and directors, officers and employees. Permits from a variety of regulatory authorities are required for many aspects of mineral exploration activities including closure and reclamation. Future environmental legislation could cause additional expense, capital expenditure, restrictions liabilities and delays in the development of the Company's properties, the extent of which cannot be predicted. In the context of environmental permits, including the approval of closure and reclamation plans, the Company must comply with standards and laws and regulations which may entail costs and delays depending on the nature of the activity to be permitted and how stringently the regulations are implemented by the permitting authority. The cost of compliance with changes in governmental regulations has a potential to reduce the profitability of operations. There may be unforeseen environmental liabilities resulting from exploration and/or mining activities and these may be costly to remedy. The Company does not maintain environmental liability insurance.

Management Discussion & Analysis; for the three and nine months ended June 30, 2018

Access to Transportation Infrastructure

Access to transportation infrastructure to ship mineral products economically within Nunavut and to export mineral products internationally is currently limited. Lack of access to transportation may hinder the expansion of production at the Property and the Company may be required to use more expensive transportation alternatives.

Competition

The mining industry is competitive in all its phases. The Company will compete with many companies and individuals that have substantially greater financial and technical resources than the Company in the search for, and the acquisition of, mineral concessions as well as for the recruitment and retention of qualified employees. The Company's ability to identify and increase reserves in the future will depend not only on its ability to explore and develop the properties, but also on its ability to select, acquire and develop suitable properties or prospects. In addition, the mining industry is facing a shortage of equipment and skilled personnel and there may be intense competition for experienced geologists, field personnel and contractors. There is no assurance that the Company will be able to compete successfully with others in acquiring such prospects, equipment or personnel.

Limited Operating History and Financial Resources

The Company has a limited operating history, has little operating revenue and is unlikely to generate any revenues from operations in the foreseeable future. The Company anticipates that its existing cash resources, together with the net proceeds from private placements, will be sufficient to cover its projected funding requirements for the ensuing year. If its exploration program is successful, additional funds will be required for further exploration to determine if any deposits are economic and if economic, to bring such deposits to production. Additional funds will also be required for the Company to acquire and explore other mineral interests. The Company has limited financial resources and there is no assurance that sufficient additional funding will be available to enable it to fulfill its obligations or for further exploration on acceptable terms or at all. Failure to obtain additional funding on a timely basis could result in delay or indefinite postponement of further exploration and could cause the Company to forfeit its interests in some or all of its exploration and evaluation assets, or to reduce or terminate its operations. Sources of funds now available to the Company are limited and may include the sale of equity capital, exploration and evaluation assets, royalty interests, the entering into of future joint ventures and the exercise of outstanding options. Additional financing may not be available when needed or, if available, the terms of such financing might not be favourable to the Company and might involve substantial dilution to existing shareholders.

Dependence upon Key Management Personnel and Executives

The Company will be dependent upon the continued support and involvement of a small number of key management personnel. The loss of the services of one or more of such personnel could have a material adverse effect on the Company. The Company's ability to manage its exploration activities and, hence, its success, will depend in large part on the efforts of these individuals. The Company faces intense competition for qualified personnel and there can be no assurance that the Company will be able to attract and retain such personnel. The number of persons skilled in the acquisition of, exploration of exploration and evaluation assets is limited and competition for such persons is intense.

Possible Conflicts of Interest of Directors and Officers of the Company

Certain of the directors and officers of the Company also serve as directors, officers and/or advisors of and to other companies involved in natural resource exploration. Consequently, there exists the possibility for such directors and officers to be in a position of conflict. The Company expects that any decision made by any of such directors and officers involving the Company will be made in accordance with their duties and obligations to deal fairly and in good faith with a view to the best interests of the Company and its shareholders, but there can be no assurance in this regard. In addition, each of the directors is required to declare and refrain from voting on any matter in which such directors may have a conflict of interest with or which are governed by the procedures set forth in the OBCA and any other applicable law.

Anconia Resources Corp. (an exploration stage Company)

Management Discussion & Analysis; for the three and nine months ended June 30, 2018

Absence of Dividends

The Company does not expect to pay any dividends in the foreseeable future.

Source of Future Funds

The only source of future funds for further exploration programs, or if such exploration programs are successful for the development of economic ore bodies and commencement of commercial production thereon, which are presently available to the Company are the sale of equity capital or the offering by the Company of an interest in its exploration and evaluation assets to be earned by another party carrying out further exploration. Management has been successful in accessing equity markets in the past, but there is no assurance that such sources will be available on acceptable terms in the future.

Risk of Dilution

Under applicable Canadian law, shareholder approval may not be required for the Company to issue additional Company Shares. Moreover, the Company has commitments that could require the issuance of a substantial number of additional Company Shares, in particular options to acquire Company Shares under the Company's stock option plan and property option agreements. The business of the Company will require substantial additional financing which will likely involve the sale of equity capital. The Company can also be expected to issue additional options, warrants and other financial instruments, which may include debt. Future issuances of equity capital may have a substantial dilutive effect on existing shareholders of the Company. The Company is not able at this time to predict the future amount of such issuances or dilution.

Price Volatility and Lack of Active Market

In recent years, the securities markets in Canada and elsewhere have experienced a high level of price and volume volatility, and the market prices of securities of many public companies have experienced significant fluctuations in price which have not necessarily been related to the operating performance, underlying asset values or prospects of such companies. It may be anticipated that any quoted market for the Company's securities will be subject to such market trends and that the value of such securities may be affected accordingly. There is no assurance that an active market for the Company's securities will develop or be sustained. If an active market does not develop, the liquidity of the investment may be limited and the market price of such securities may decline.

Other Information

Additional information about the Company is available on SEDAR at (www.sedar.com) or the Company's website (www.anconia.ca).
